How to translate the vision into practice?

US National Academies of Sciences, Engineering, and Medicine
A Framework for Educating Health Professionals to Address the Social Determinants of Health
Is it sufficient to treat people’s illnesses, without changing the conditions that made them sick in the first place?

which raises the question . . .

Is it sufficient to educate and train health workers to treat people’s illnesses, without educating and training them to change the conditions that make people sick in the first place?
