SDMH Affecting Perinatal Mood Disorders: Triggers of Anxiety

Case Study of Gloria

Leaders
Robert Keefe, University at Buffalo
Emily Stinnett Miller, Northwestern University
Breakout Group Agenda

9-9:10am - Opening & BRIEF introductions
9:10-9:30am - Discuss case study
9:30-9:50am - Small group activity
9:50-10:00am - Large group discussion
10:00-10:15am - Return to the main room
Gloria is a 27 yo G3P2 who presented to Rochester Regional Health in labor at 36 weeks 1 day gestation

- History of diabetes and hypertension
- Reports active use of marijuana and tobacco

Progressed quickly in labor and had a vaginal delivery

At delivery a large retro-placental clot was noted

- EBL = 800mL

Several clinicians noted Gloria did not seem to appear to understand discussions pertaining to prematurity or her excessive blood loss
Medical History - Rounding Update

- Gloria is stable and has Medicaid so is eligible to remain in the hospital for 48 hours postpartum.

- Her infant did well and was anticipated to be discharged within 48 hours after birth.

- She will be referred to the SW for discharge planning, with instructions to follow-up with her clinic provider within 6 weeks (Medicaid will cover for up to [60] days)
Given the medical history, are you comfortable with discharging Gloria?
Social History - Rounding Update

- Gloria lived and worked in inner city Rochester, NY her entire life
- Her grandparents moved to this neighborhood from NYC in 1961
- Her parents had an 8th grade education
- She and her 5 siblings all dropped out of high school
- Married for 8 years
- Just prior to the birth, Gloria was in a motor vehicle accident
Do you have any questions for Gloria before you discharge her?
Social History - Rounding Update

• **Relationships**
  – Reginald is Gloria’s husband; Hx of incarceration; No steady employment/low-paying jobs; Has 3 children not with Gloria
  – No friend or family support
  – Cares for 2 children and now 1 newborn
  – Feels supported by her health center

• **Living situation**
  – High-crime neighborhood
  – Recently evicted
Social History - Rounding Update

The motor vehicle accident

“[O]ne day we were driving to Walmart. And she seen us in the car together...with our kids. And she ...jumped out her car window... [W]e tried to lock all the doors, but he didn’t get the last back door. And she got in, and she punched me in the stomach probably like eight times. Telling me ‘I’m gonna kill the baby’. That scared the hell out of me. ...that day, all my fluids leaked.... they rushed me into the hospital, and then I had [my daughter] ...that same day.”
What were the social determinants that affected Gloria?
List the SD that affected Gloria

1. Poverty
2. Housing
3. Crime
4. Family
5. Social support
6. Low income
7. Food insecurity
8. Education
9. Pollution/toxins
10. Spousal safety
