

Panel 5 Report Back: Extra-mural research collaboration

Research can operate as...:

- Teams (multi-disciplinary strategic science)
- Consortia (addressing/engaging community partners)
- Suppliers (e.g., medical counter measures; pub/private)
- Broad networks (both intra- and inter-disciplinary)

Challenge: WHO can organize and coordinate these collaboratives?

- Mission agencies (CDC, Interior, etc.)
- Funders (NIH, NSF, Foundations)
- Regulators (FDA)
- OR... can we “crowd-source” the most wicked problems (www)

Opportunities:

- Recommendations for regulatory relief (FACA)
- Pilot-test the system
