

Report Back: Panel 6: Coordinating Logistics to Execute Rapid Research in Disaster Response

Top 2-5 Challenges/Issues:

1. Integration with response structures and systems (ICS)
2. Identify research questions and outcomes.
3. Capture immediate information (training, rapid data collection & systems)

Short & Medium Term Opportunities:

1. Integrate research into elements of the Emergency Support Functions
2. Centralized support for human subjects research (Reliance, PHERRB)
3. Incorporate research into response training.
4. Develop a national research response framework

Critical Partnerships and Collaborations:

- Response elements (local, state and federal)
- Trainers across multiple response dimension
- Federal research institutions (NIH, CDC, NSF, non-health)
