IOM Committee’s Goals for Developing Graduate Medical Education Policy Recommendations

**GOAL 1:** Encourage *production of a physician workforce* better prepared to work in, help lead, and continually improve an evolving health care delivery system that can provide better individual care, better population health, and lower cost.

**GOAL 2:** Encourage *innovation in the structures, locations, and designs* of GME programs to better achieve Goal 1.

**GOAL 3:** Provide *transparency and accountability* of GME programs, with respect to the stewardship of public funding and the achievement of GME goals.

**GOAL 4:** Clarify and strengthen *public policy planning and oversight* of GME with respect to the use of public funds and the achievement of goals for the investment of those funds.

**GOAL 5:** Ensure *rational, efficient, and effective use of public funds* for GME in order to maximize the value of this public investment.

**GOAL 6:** Mitigate *unwanted and unintended negative effects* of planned transitions in GME funding methods.
