Building ecosystems in Kenya where 21st Century SDG 3 partnerships thrive!
Why? The momentum is here ... Delivering Universal Health Coverage in Kenya

CONFRONTING NEEDS

- Kenya has made substantial strides in, reducing maternal, infant & child mortality & the fight against HIV/AIDS.
- Stubbornly high ratios of communicable & upcoming non-communicable diseases & high # of fatalities due to traffic accidents etc.
- SDG progress must focus more on addressing regional disparities and socio-economic equity of benefits in order to make sure that Kenya leaves no-one-behind.

NATIONAL OWNERSHIP

- UHC key priority in Kenya’s Big Four agenda
- “Primary health care best bet for UHC” Hon Kariuki, Cabinet Secretary for Health, Kenya
- “Be assured of County Governments’ commitment to the Big Four agenda. Our guiding message is collaboration, cooperation and consultation” H.E Nanok, Governor of Turkana and former Chairman of CoG.

INCREDIBLE OPPORTUNITIES

- Broad-base international and national support from all partnership constituencies: governments, development partners, private sector, civil society, academia, philanthropy, and faith-based
- Promising practice for innovations in healthcare financing and delivery
- Kenya leader in entrepreneurship and impact investing
Why building ecosystems in Kenya where 21st Century SDG3 partnerships thrive?
It’s a win – win!

**Public sector will benefit from**

- Accelerating the trajectory towards the attainment of SDG3.
- Stimulating long-term commitments and investment by private companies in new areas which deliver value-for-money.
- Introducing new models that drive delivery of SDG3 impacts nationally and reduce reliance on government and donor funding long term.
- Harnessing data and technology driven solutions tailored to county-specific needs.
- Receiving support for policy changes and enabling environment needed and coordinated at multiple levels.

**Private sector will benefit from**

- Emerging market for delivery of SDG3 impacts in Kenya.
- Co-creation of 21st Century shared-value partnership models towards reasonable & sustainable returns.
- Delivering larger impact through coordinated implementation of large initiatives with government, the UN and credible companies.
- Demonstrating success in a collaborative model replicable to other countries across the continent.
- De-risking investments and reducing transaction cost by jointly eliminating barriers to implementation and unleashing efficiencies.
How we facilitate partnership development? Convene, connect & catalyse!

- **Public private dialogues** to enhance common understanding and trust within the ecosystem.

- **Advocacy** to enhance Kenya’s regulative and policy environment for Health PPP/Cs to thrive.

- **Technical support** for development of Kenya’s Health PPP strategy and training toolkit.

- **Capacity building** for national and county government officials to steward Primary Healthcare PPP/Cs.

- **Co-creates and early-stage transaction support** to move promising Health PPP concepts from idea to implementation.

- **Market research and knowledge exchange** to inform fit-for-purpose design and scaling of:
  - Innovative financing and business models for PHC delivery.
  - Data & technology driven partnership solutions that strengthen the delivery of PHC.
What is doing all this? The SDG Partnership Platform in Kenya

- **Neutral broker** convening leadership from Government, UN, development partners, private sector, philanthropy, civil society, academia, and faith-based organizations to build ecosystems where SDG partnerships, financing, and innovations are catalyzed for the implementation of Kenya’s Big 4 agenda in order to accelerate the attainment of the Country’s Vision 2030.

- **Primary Health Care (PHC) is the first SDG Partnership Platform Window** to contribute to attainment of Universal Health Coverage.

- **Governed by PHC Window Steering Committee** which is co-chaired by the Cabinet Secretary for Health, Chair of the Council of Governors Health Committee and UN Resident Coordinator. In addition to the Kenya Healthcare Federation, all Window investors are represented in the Steering Committee to jointly discuss and agree on the Window’s strategies, workplans, and budgets.

- Implementation of strategic plans is coordinated by the **Platform Secretariat** which supports Platform partners to harness each others comparative advantages for the implementation of the plans, collaborate through technical working group, and actively participate in relevant Ministry of Health UHC sub-committees and subsequently report to the UHC Steering Committee and Apex.

- In line with the PHC Window strategic plan, **key milestones** have been reached towards the following three sub-outcomes:
  - **Enhanced government capacities** to advance public private collaboration for the financing and delivery of PHC.
  - **Innovative financing mechanisms advanced** in support of Kenya’s domestic resource mobilization agenda for Health.
  - **Innovative solutions and partnerships catalyzed** to strengthen PHC delivery.

- **Platform has received global recognition from UNDCO and the Dag Hammarskjold Foundation as a best practice model to accelerate SDG financing**
THANK YOU!!
