

PANDEMIC & EMERGENCY PREPAREDNESS

Health & Emergency
Planning for Families
& Providers

Denise M. Nunez MD, MPH
Preventive Medicine &
Public Health

Emergency Preparedness

An essential tool for protecting
current and future health

"A state of readiness to respond
to a disaster, crisis or any type of
emergency"- FEMA 2020

Pandemic Preparedness

A component of emergency preparedness that includes transmissible infections

An issue highlighted by the current COVID-19 pandemic

**Pandemic &
Emergency
Preparedness Guide
for Families &
Providers**

- Tool to create a tailored family plan
- Review of individualized health needs for household members in setting of emergency or pandemic
- Creation of plan to respond to emergencies
- Review of resources (local & national) to support plan

SENSORY DISABILITY

- Ensure handheld **electronic devices** are charged
- Have spare chargers
- Consider having a small **pop-up tent** to decrease visual stimulation
- Have **noise-cancelling headphones** or earplugs to reduce auditory stimulation
- Have items that **soothe** you/your child such as snacks, stuffed animals, etc.

DEAF/HARD OF HEARING

- Hearing-aid batteries
- Pen & paper to communicate in an emergency
- **Battery operated lantern** to be able to communicate if the electricity is out
- Carry **printed cards** or store information on your devices to inform first responders and others how to communicate with you
