Taking Stock of Science Standards Implementation: A Summit
Implementation by the Numbers Coffee Talk
Wednesday, January 18, 2022 | 3:00 PM – 4:15 PM EST

Moderated by: P. Sean Smith, *Horizon Research, Inc.*

Science standards implementation is a broad landscape that covers a wide array of levers to include how much time is devoted to science and engineering, the tools and resources that are available, and teacher preparation and use of particular pedagogical approaches. Please join the National Academies of Sciences, Engineering, and Medicine's Board on Science Education for a series of webinars based on the recent summit on Taking Stock of Science Standards Implementation. Join us for the first in the series as Sean Smith from Horizon Research, Inc. provides an overview of the landscape of implementation described in a number of reports produced by Horizon. There will be time for the community to reflect on and discuss the implications of the data presented.
