Taking Stock of Science Standards Implementation: A Summit

Supporting 3D Instructional Shifts Coffee Talk

Wednesday, April 6, 2022 | 3:00 PM-4:30 PM EDT

Moderated by: Susan Gomez Zwiep, *Senior Science Educator, BSCS Science Learning*

Science standards implementation is a broad landscape that covers a wide array of levers to include how much time is devoted to science and engineering, the tools and resources that are available, and teacher preparation and use of particular pedagogical approaches. The preparation of our educators is central to these conversations. Please join the National Academies of Sciences, Engineering, and Medicine's Board on Science Education for a series of webinars based on the recent summit on Taking Stock of Science Standards Implementation. This final webinar in the series, moderated by Susan Gomez Zwiep, will consider the pathways for teacher preparation. Panel and small group think time are structures that will be implemented in this webinar as we reflect on and discuss as a community the preparation of our educators.

Panelists:

Malcolm Bulter, *University of North Carolina at Charlotte*

Tiffany McDole, *Education Commission of the States*

Hannah Putnam, *National Council on Teacher Quality*
