

TRANSFORM THE WASTE: 3MM MTA of Circular and Renewable Solutions By 2030

- **Driven by brand owner commitments**
- **Maximize Value Through Key Strategic Actions**

Invest to Grow

Decarbonize

Transform the Waste

- **Scale circular feedstock supply** through direct investments and strategic partnerships
- **Deliver next-generation technologies – Dissolution and gasification**
- **Commercialize 3MM MTA of circular and renewable solutions through Chemical Recycling (CR), Mechanical Recycling (MR) and biobased materials**

Deliver Breakthrough Innovation

Combining Strengths to Accelerate Impact

Value Chain Collaborations

Waste Collection

Advanced and Mechanical Recycling and Bio-Based Feedstocks

Partnerships and Funds

Partnership Spotlight

Dissolution Technology JDA

Transform
hard-to-recycle
waste into circular
PE

Innovate
novel technology
with lower GHG
emissions

Accelerate
PCR in
packaging
applications

SCGC

Forming End-to-End Circularity Partnership

Access to waste
in region with
largest plastic
waste supply

Supply at scale
delivering
200 KTA of
circular products

**Differentiated
technology**
accelerated by
integration
