

12:00:32 From Deborah Glickson, Director of BESR To Everyone:

Hi Alan and Paula and all! Thank you again for agreeing to serve on this important committee!

12:01:00 From Deborah Glickson, Director of BESR To Everyone:

I'm currently on the metro coming back from a trip so apologies for being off video and on mute.

13:11:20 From Miles Lansing, NASEM To Everyone:

sorry guys!

13:11:44 From Andy Thompson, Committee To Everyone:

Thanks for raising that point, Ted.

13:17:52 From Ying-Tsong Lin, Committee To Everyone:

I will need to leave at 13:00 EST back to the conference.

13:26:20 From Kim Bernard, Committee To Everyone:

I'm back, just eating some toast, so video off

13:27:34 From Tim McGovern (he/him) To Everyone:

Can you hear me?

13:28:08 From Ahmir Robinson, AV TECH To Everyone:

Tim try to disconnect your audio and reconnect with computer audio

13:29:54 From Kim Bernard, Committee To Everyone:

I will need to leave around 11:30am PT

13:34:56 From Margo Regier, NASEM To Everyone:

I'm sorry all - that agenda is incorrect!

13:35:16 From Margo Regier, NASEM To Everyone:

Presentation of past reports will occur first and sponsor reflections later

13:56:44 From Kim Bernard (she/her), Committee To Everyone:

We are seeing it in presenter view

14:46:44 From Kim Bernard (she/her), Committee To Everyone:

My apologies, I need to run to another meeting. This has been extremely helpful, thank you for all the presentations. I sent a few questions to Alan to ask on my behalf.

14:47:28 From Margo Regier, NASEM To Everyone:

Committee members - please raise your (virtual) hand to ask questions of NSF and Paula will call on you

14:55:32 From Nancy Sung, NSF To Everyone:

I need to sign off, due to a schedule conflict- thanks all!

14:57:21 From Deb Glickson, NASEM To Everyone:

RCRV - regional class research vessel. the newest UNOLS vessels...

15:00:06 From Heather Lynch, Committee To Everyone:

I can try again when there is a chance. I switched microphones.

15:05:10 From David W Titley To Everyone:

is NSF comfortable with the nearly 10 meter draft & its coastal mission?

15:10:49 From Dan Costa, Committee To Everyone:

It is becoming increasingly clear how important that the committee develop a strong consensus on the science and importance of a new ARV to achieve that science

15:10:58 From Tim McGovern (he/him), NSF To Everyone:

Dave - the ARV will be outfitted with four "small" watercraft. A 30' landing craft, a 20-30' survey boat, and a couple of RHIBs. I think the ARV will serve as a good vessel to provide access to these coastal regions.

15:11:23 From David W Titley To Everyone:

@Tim - thanks!

15:11:42 From Heather Lynch, Committee To Everyone:

Tim- Under what sea conditions can those smaller boats be launched?

15:13:14 From Tim McGovern (he/him), NSF To Everyone:

@Heather - obviously it will vary to some degree, but the ARV is currently being designed to have dedicated launch/recovery davits for at least some of the science workboats. That will dramatically help increase the conditions the boats will be able to be launched in.

15:14:28 From Heather Lynch, Committee To Everyone:

Tim- Maybe this is explained in the vessel docs, but are personnel going over the side of the ARV in the small boat (via crane), or are they going down a ladder like on the LMG?

15:16:44 From Tim McGovern (he/him), NSF To Everyone:

Heather - we are continuing to look at options for getting people on the small boats, either already aboard in the davit-launched small boats or in other safer ways.

15:20:40 From Deb Glickson, NASEM To Everyone:

Thank you, Dave and Jim!

15:21:06 From Roberta Marinelli, NSF To Everyone:

Thanks Everyone! We appreciate the work you have done and are going to do!

15:25:32 From Margo Regier, NASEM To Everyone:

Tim's presentation is on the google drive under Meetings > Riles for December meeting

15:25:45 From Margo Regier, NASEM To Everyone:
