

Jessie Tenenbaum, PhD, FACMI

- 1996-2002- Program Manager at Microsoft
- 2007- PhD in Biomedical Informatics- Stanford
 - 2006- National Academies Mirzayan Fellow
- 2007-2015- Associate Director for Bioinformatics, Duke Translational Medicine Institute
- 2015-present- Assistant Professor, Duke University
- 2019-2021 (?)- Chief Data Officer, North Carolina Department of Health and Human Services
- AMIA Board of Directors, J Biomed Inf Associate Editor, NLM BoSC

Research Interests

- Mining EHR data for patient stratification in mental health
- Structured data *and* text
- Fully identified, highly sensitive PHI
- Extract symptom-related terms

Reactions to Workshop Statement of Task

- Tools to help:
 - Calculate and publicize going rate for storage (per gig per year?)
 - Clarification of rules (e.g. still pending changes to Common Rule)
 - ELSI research, clear policies, a la Google lawsuit
- Methods to encourage:
 - Require as part of grant/budget
 - Stick: no data, no indexed publication
 - Carrot: recognition of best practices
- Challenges:
 - Risk of breach- financial, NYX headline
 - YATTPIAG (yet another thing to put in a grant)
