**Committee for the Analysis to Enhance the
Effectiveness of the Federal Quarantine Station
Network based on Lessons from the COVID-19
Pandemic**

Committee Meeting Agenda

January 19, 20, and 21, 2022

January 19, 2022, 10 a.m. – 1 p.m. ET

January 20, 2022, 2 p.m. – 5 p.m. ET

January 21, 2022, 11 a.m. – 2 p.m. ET

This meeting is being held to gather information to help the committee conduct its study. This committee will examine the information and material obtained during this, and other public meetings, in an effort to inform its work. Although opinions may be stated and lively discussion may ensue, no conclusions are being drawn at this time; no recommendations will be made. In fact, the committee will deliberate thoroughly before writing its draft report. Moreover, once the draft report is written, it must go through a rigorous review by experts who are anonymous to the committee, and the committee then must respond to this review with appropriate revisions that adequately satisfy the Academies' Report Review Committee and the NAS president before it is considered an official Academies report. Therefore, observers who draw conclusions about the committee's work based on today's discussions will be doing so prematurely.

Furthermore, individual committee members often engage in discussion and questioning for the specific purpose of probing an issue and sharpening an argument. The comments of any given committee member may not necessarily reflect the position he or she may actually hold on the subject under discussion, to say nothing of that person's future position as it may evolve in the course of the project. Any inference about an individual's position regarding findings or recommendations in the final report is therefore also premature.

Meeting Objectives

- Hear international perspectives on COVID-19 mitigation measures
 - Hear perspectives from the private industry (cruise and airline) and discuss their relationship with CDC
 - Discuss legal and regulatory issues pertinent to US quarantine stations
 - Identify best practices in response efforts and determine measures that are applicable to the US context at national, state, and local levels
 - Begin the development of draft conclusions and recommendations for the report
