

New Challenges in Food and Nutrition to Inform Policy

David M. Klurfeld, USDA Agricultural Research Service,
Beltsville, MD

ARS Research Over the Next Decade

- Support dietary guidance
 - DRI's, DGA, effects of nutrients vs foods vs dietary patterns
- Transition from public health model to precision nutrition recommendations
- Technologies needed for food intake, physical activity, microbiome, genome, epigenome, small (mi, si, pi) RNA's
 - Systems approach (AI/ML) to analyze data
- New foods, ingredients, new uses from NP306
 - Vitamin D enriched mushrooms; low-fat, high-fiber salad dressings
- Biology vs Behavior

Human Nutrition Action Plan Components 2019-2024

- 1) Linking Agricultural Practices and Beneficial Health Outcomes
- 2) Monitoring Food Composition and Nutrient Intake of the Nation
- 3) Scientific Basis for Dietary Guidance
- 4) Prevention of Obesity and Obesity-Related Diseases
- 5) Life Stage Nutrition and Metabolism

Ten Years From Now ...

- At least 10 more best-selling diet books
- >100,000 new food products
- 2 new sets of *Dietary Guidelines for Americans*
- Continued intentional and unintentional nutrition misinformation

Science will ...

- Become more inter- and trans-disciplinary
- Become bigger in scope and budget
- Still not connect with the American public
- Increase focus on (forestalling) aging

ARS developed technology to cast 100% fruit/vegetables as films/bars/chips

UV Light Pulse Induces Vitamin D₂ Formation

Blood Concentrations

Vitamin D2

Vitamin D3

[API Guide](#)

FoodData Central is an integrated data system that provides expanded nutrient profile data and links to related agricultural and experimental research.

FoodData Central:

- Includes five distinct types of data containing information on food and nutrient profiles, each with a unique purpose.
- Provides a broad **snapshot in time** of the nutrients and other components found in a wide variety of foods and food products.

| Description | Type | Published Date | FDC ID | |
|---------------------------------------------------------|----------------|----------------|--------|----------------------------------------------------------------------------------------------------------------------------------|
| Milk, whole | Survey (FNDDS) | 2019-04-01 | 336070 | Includes: 3.5% or 3.8% fat <i>milk</i> ; leche fresca |
| Crackers, milk | Survey (FNDDS) | 2019-04-01 | 340202 | Includes: <i>Milk</i> Lunch New England Biscuits; Royal Lunch crackers |
| Milk, malted, chocolate, made with milk | Survey (FNDDS) | 2019-04-01 | 336244 | |
| Coconut milk | Survey (FNDDS) | 2019-04-01 | 336111 | |
| Crackers, milk | SR Legacy | 2019-04-01 | 174980 | |
| Milk, human | Survey (FNDDS) | 2019-04-01 | 336068 | |
| Milk, NFS | Survey (FNDDS) | 2019-04-01 | 336069 | |
| Rice milk | Survey (FNDDS) | 2019-04-01 | 336110 | |
| Soy milk | Survey (FNDDS) | 2019-04-01 | 336099 | |
| MILK | Branded | 2019-04-01 | 356718 | Ingredients: <i>MILK</i> , HIGH FRUCTOSE CORN SYRUP, SUGAR, NONFAT DRY <i>MILK</i> , CORN STARCH, COCOA, COCOA (PROCESSED |

**S Krishnan et al,
Am J Clin Nutr 108: 266,
2018**

**No effect on most
parameters**

Systolic BP -9 mm Hg

**Total and HDL cholesterol
decreased 5% and 6%**

Baseline – black line
Week 2 – red line
Week 8 – blue line
Bars = SD

**“It's tough to make predictions,
especially about the future.”**

New Technologies Needed For ...

- Food intake
 - Metabolome, Proteome
- Physical activity/Energy expenditure
- Genome
- Epigenome
- Microbiome/Metabolic products
- miRNAs
- Data analysis by AI/ML
