Approaches to Assessing Intake of Food and Dietary Supplements in Pregnant Women and Children 2 to 11 Years of Age: A Workshop

Goals

- To identify the suite of current methods used in dietary assessments, including food and dietary supplements, in pregnant women and children 2-11 years old
- To identify the methodological challenges and opportunities in improving current methods
- To explore methodologies in other disciplines and their application in dietary assessments in those populations
- To discuss factors to consider when implementing dietary assessment tools in those populations
