

Session 6: Final Discussion and Synthesis

Session Goals:

- Identify promising opportunities and directions and best-known practices in the application of advanced computation, big data analytics, and high-performance computing to food and nutrition research.
- Consider likely pitfalls, including those associated with privacy, bias, and trust, and safeguards to avoid them.
- Reflect on the appropriate use of evidence generated from advanced computation, big data analytics, and high-performance computing.
- Consider needed investments in capacity development.
