Committee on Complementary Feeding Interventions for Infants and Young Children Under Age 2: Scoping of Promising Interventions to Implement at the Community or State-Level

The National Academies of Sciences, Engineering, and Medicine
November 2, 2022

Effect of Maternity Care Practices on Breastfeeding

Improve nutrition for infants and young children

▪ Interventions in a research or clinical setting – can they work at a community or state level?

▪ Key areas for review:

- **Identify** interventions that can be implemented in real-world settings
- **Impact** select nutrition behaviors/outcomes
- **Reach** higher risk populations, reduce inequities and complement existing federal-level programs for lower income populations

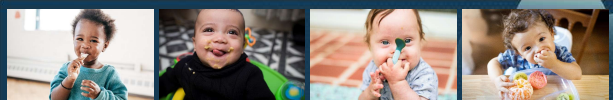

Identify Settings and Feeding Behaviors

Impact, Scalability, and Implications

Thank you
