Session Two: Identifying Essential Components of Care by Defining What Minimally Adequate Care Would Be Across Diverse Care Settings

No Conflicts to Disclose

When Do Large Health Care Systems Implement Change?

Issue

1. Grow Market Share

2. Legal requirement

3. Lawsuits (real or threatened)

4. Lawsuits - windfall

5. Save money/reduce costs

6. Labor shortages

7. Information system implementation

8. New evidence/redesign

9. Clinical champion

Example

1. Employer requirement

2. Public Health/State Regulations

3. Homeless discharge

4. Smoking settlement. Opioids?

5. Medical home, diabetes

6. Redesign primary care

8. Stop HRT; statins, warfarin

9. Clinician/CEO/Board

What is NOT on the List? (Potential Pitfalls)

1. Bright ideas without solid and specific evidence

2. Cadillac Models

3. Virtually anything in a bad or tumultuous budget year

4. Anything disrupting primary care

5. Programs that STOP things

Form Follows Funding

BUT:

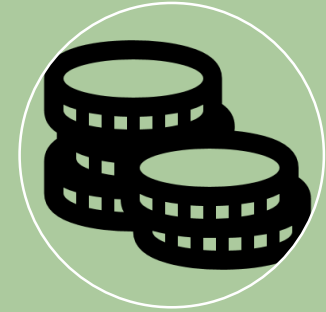

Technology: web-based interventions

Artificial intelligence

Social determinants of health (“the buzz”)

Financial incentives

- Regulatory
- Quality measures (with incentives)
