

AMSPDC Workforce Initiative: Our Hopes

- Create pediatric workforce advocacy support information to improve pipelines and funding; specific areas of focus: pediatric subspecialties (CHGME) and behavioral health
- Document shortages risks now and into the future, informing how we remediate the challenge
- Strengthen the case with an access study (via CHA) assessing wait times to appointments for pediatric care with a focus on behavioral health
- Inform the dialogue on the broader range of pediatric workforce: (non-ABP) specialties, nursing, advanced practice
- Coordinate on 2023 CHGME reauthorization and funding shortfalls: early results by May, 2023, are helpful
