

Endocrine late effects reported in 2/3 of adult survivors of childhood cancer

Hudson M JAMA 2015, Pradhan KR JCEM 2019

Surveillance guided by evidence-based guidelines
Children's Oncology Group Long-Term Follow-Up Guideline for Survivors of Pediatric, Adolescent and Young Adult Cancer

Survivor Care Plan
Pediatrics - Survivor clinic

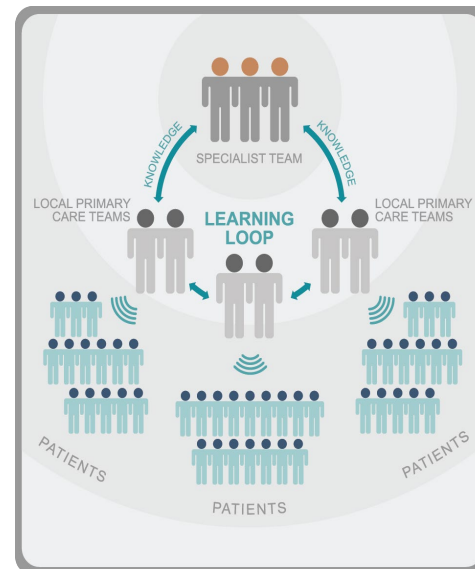

Adult care
Who? Where?
What? How?
When?

Access to Endocrine Care

Or any subspecialty care

Barriers

- Limited specialists
- Patient hesitancy
- Disparities

1. Very late onset
2. New endocrine LE with new targeted therapies
3. Require lifelong surveillance

Can this be facilitated by:

- Executive summary
- Survivor driven
 - Passport for Care™ or Cancer SurvivorLink™
- E Health - apps
- EMR prompts
- Telemedicine

ECHO the Multiplier Effect

- Amplification of expertise using technology
- Case based learning
- Disseminates best practice-reduces disparities
- Discern
 - What endocrine problems can be managed by PCP
 - Timely referral endocrine issues that need to be managed by an endocrinologist
