

SCRI:

US Community-Based Clinical Research Partnership

18 Oct 2023

SCRI:

Successful Partnership Built around Clinical Research

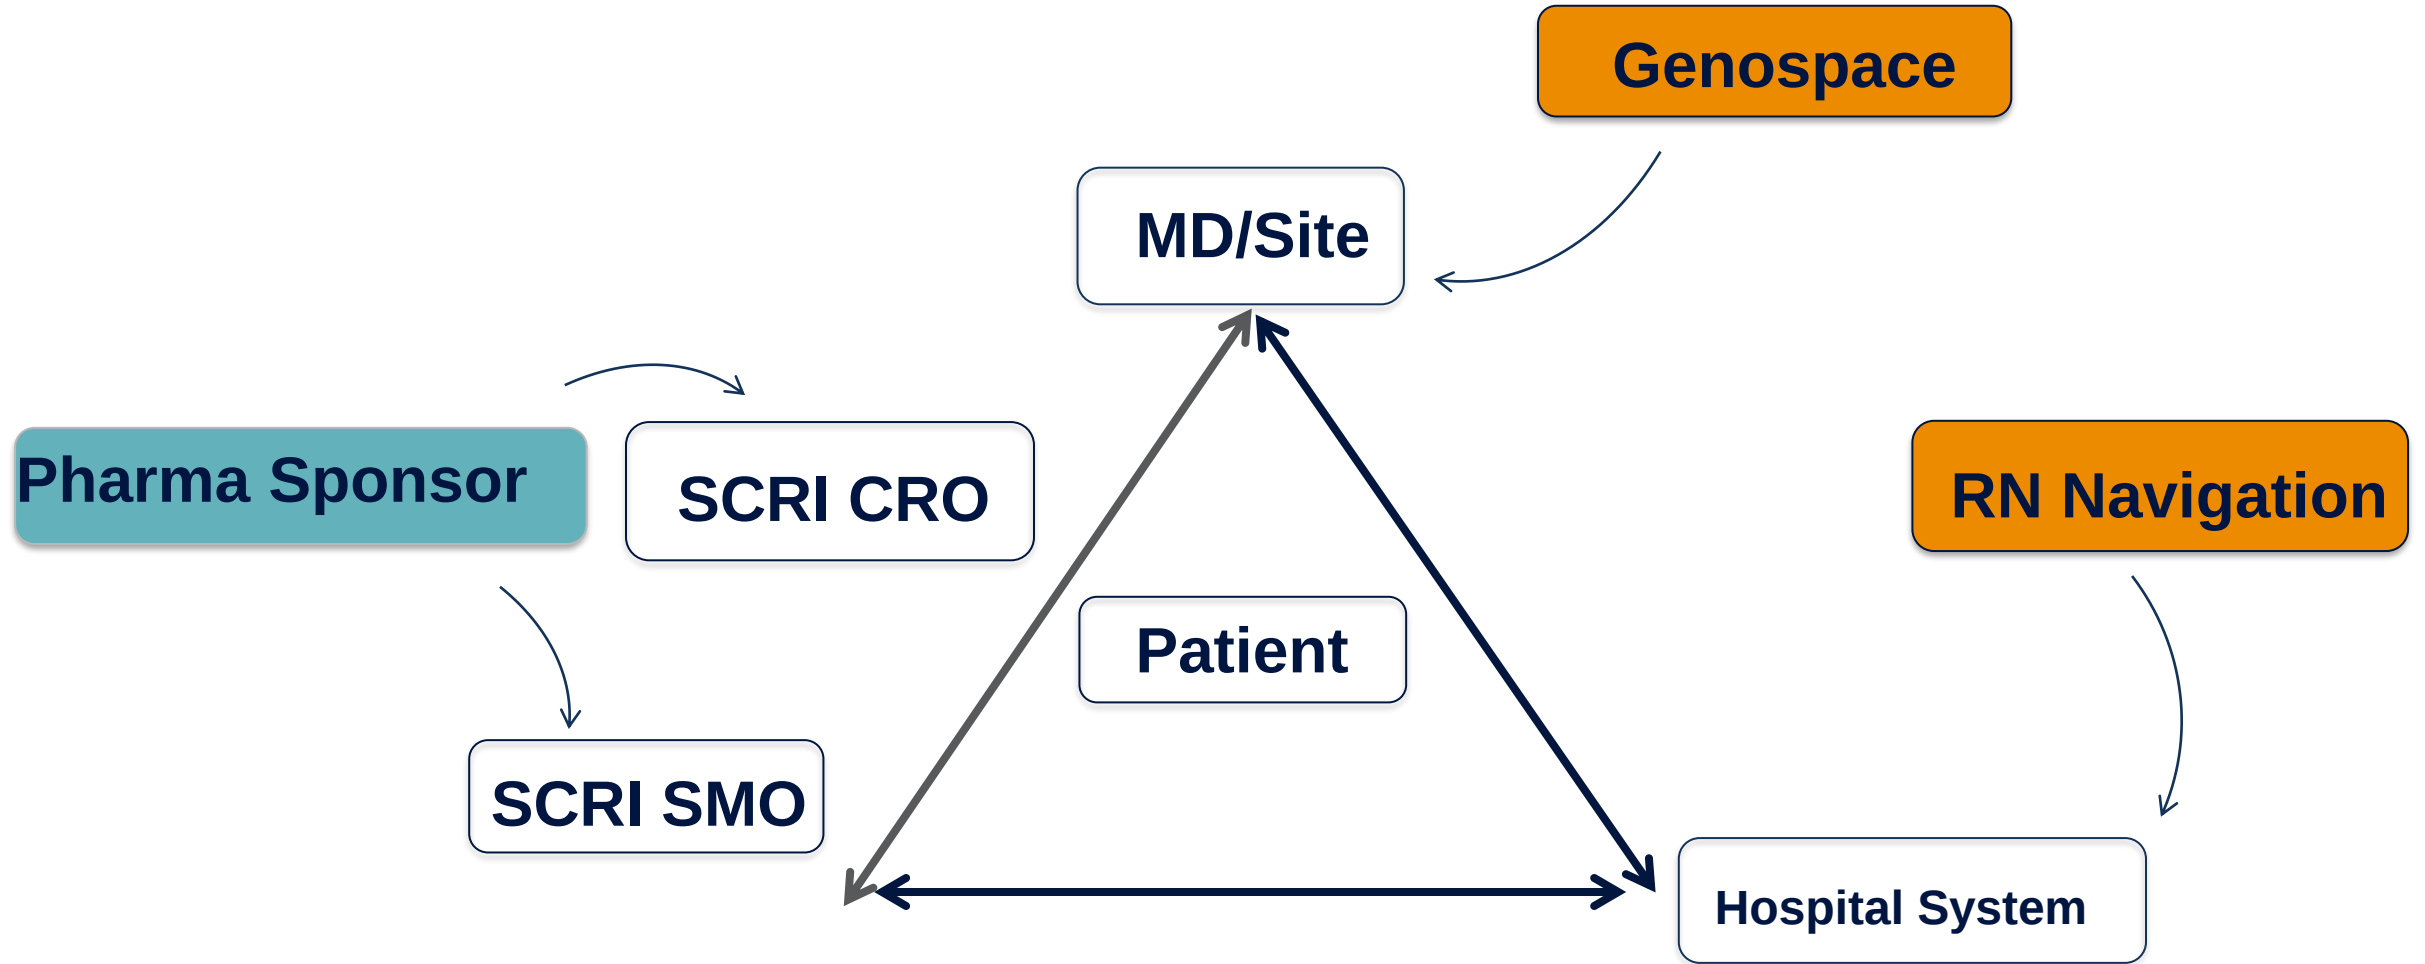

CONFIDENTIAL – Contains proprietary information.
Not intended for external distribution.

WHY does it work?

Aligned Interests & Incentives

- Patients
 - Access to Cutting-Edge Therapies Close to Home
- Healthcare Service Providers
 - Keep Patients in the system
- Pharma/Biotech
 - Quality clinical development of novel compounds “Go-No Go”

HOW does it work: Sharing the Responsibility of Cancer Care

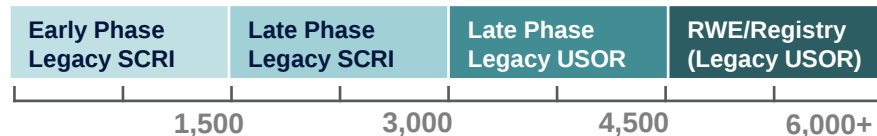

DOES it work?

From Phase I to Approval, We Make an Impact on Drug Development

Who we reach

4,500+ registered patients participating in trials yearly

Enrollments by Phase/Type

1,000+ trials actively enrolling

Combined impact

Approaching

700

first-in-human trials conducted over the last 3 decades

Participated in the development of **29 of 37**
FDA approved cancer therapies for adults in 2022

WHO we are – teaming up to advance research

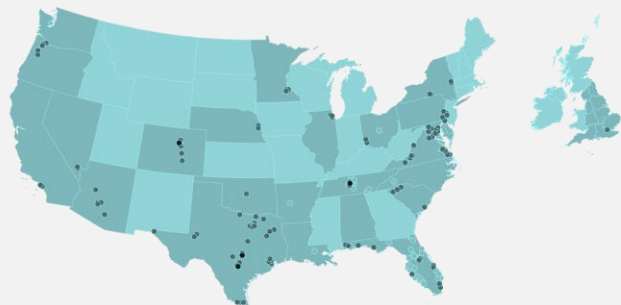

Sarah Cannon Research Institute advances cancer therapies for patients

by providing clinical support, trial access, patient recruitment, and operations expertise for partners

Where we are

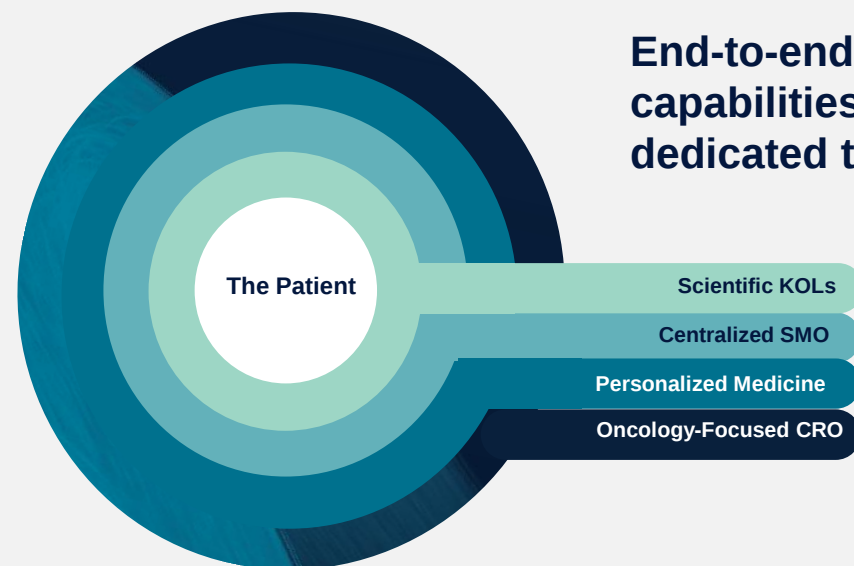

1,300+

**Research
Physicians**

250 Locations in **24** States

What we deliver

**End-to-end research
capabilities fully
dedicated to oncology**

Our research network reaches 1 in 5 patients with cancer through our affiliated sites¹

1| In 2022, Sarah Cannon Research Institute (SCRI) and US Oncology Research combined into a joint venture, operating as SCRI.

End-to-End Research Capabilities

The only organization in the industry to offer SMO, CRO and personalized medicine services together.

Centralized SMO (Site Management Org)

- Oversees a network of sites where physicians enroll and treat patients on clinical trials
- Manages site operations for studies through:
 - Program Development & Study Start-up
 - Regulatory & Safety
 - Contracting & Financial Services
 - Protocol Excellence
 - Global Quality & Education
 - Technology Integration & Support
 - Financial Planning & Analysis

Oncology-Focused CRO (Contract Research Org)

- Contracted by biopharma to design, manage and monitor trials as well as analyze results
- Works with SMO and/or other sites to oversee:
 - Clinical Development
 - Strategic Planning & Oversight
 - Clinical Monitoring
 - Medical Monitoring
 - Medical Writing & Publishing
 - Pharmacovigilance
 - Regulatory Affairs
 - Data Management
 - Project Management
 - Biostatistics

Personalized Medicine Powered by Genospace

- Leverages real-world data to advise physicians and biopharma on clinical development and treatment planning. Informs trial design, trial matching, optimal treatment recommendations for patients and population diversification.
- Powered by cloud-based precision medicine technology developed by Genospace that transforms patient data into actionable insights.

Scientific KOLs

- World-renowned faculty of academically-trained physician leaders providing valuable insights into the optimal execution of all aspects of clinical research.

CONFIDENTIAL – Contains proprietary information.
Not intended for external distribution.

SCRI Combined Network by Research Specialty

“Site Management Organization” (SMO)

Drug Development

- Denver DDU (Sarah Cannon at HealthOne)
- Florida Cancer Specialists - Lake Mary DDU
- Florida Cancer Specialists - Sarasota DDU
- HCA Healthcare UK
- Sarah Cannon - Lake Nona DDU
- Sidney Kimmel Cancer Center DDU
- Stephenson Cancer Center DDU
- Tennessee Oncology - Nashville EP
