Our Mission

- **Promote the inclusion of women in clinical trials** and the implementation of guidelines concerning the representation of women in clinical trials and the completion of sex/gender analysis
- **Identify** and monitor the progress of **crosscutting** and multidisciplinary women's health initiatives including **changing needs, areas that require study, and new challenges** to the health of women as they relate to FDA's mission
- **Serve** as the **principal advisor to the Commissioner** and other key Agency officials on **scientific, ethical, and policy** issues relating to women's health

SCIENCE

EDUCATION

ENGAGEMENT

OWH achieves its mission through the foundational principle that Sex is a Biological Variable (SABV)

SEX DIFFERENCES

PRE-CLINICAL STUDIES
Using Both Male and
Female Animals

**POST-MARKETING
MONITORING AND
SAFETY ALERTS**

**DATA ON SAFETY
AND EFFECTIVENESS**

**SEX
ANALYSES**

1998 “Demographic Rule”

IND regulations (21 CFR 312.33(a)(2)):

- Require that IND data regarding subjects’ participation in clinical trials be presented in annual reports by gender, age, and race.

NDA regulations, at 21 CFR 314.50(d)(5)(v), (vi)(a):

- Require sponsors of NDAs to include summaries of effectiveness and safety data presented by gender, age, and race.

December 2015

OWH Created the First FDA Women's Health Research Roadmap

<http://inside.fda.gov:9003/downloads/scienceresearch/specialtopics/womenshealthresearch/ucm479681.pdf>

Priority Areas Outlined in OWH Women's Health Research Roadmap

Read the Women's Health Research Roadmap

<https://www.fda.gov/science-research/womens-health-research/womens-health-research-roadmap>

Research Funded by OWH

- Identifying **genetic mechanisms** of **doxorubicin-Induced cardiotoxicity (DIC)**
- Comprehensive assessment of **sex-differential smoking-related effects** in publicly available **gene expression data**
- Impact of sex-based differences in the expression of host **non-coding RNA biomarkers** that can **diagnose early HIV-1 infection**
- Sex differences related to **Alzheimer's disease** as revealed by **Exome sequencing and RNA Seq**
- Evaluation of **transcriptomics-based** predictions of sex- and age-related susceptibilities to **treatment-induced adverse effects** in F344 rats
- The role of **epigenetic mechanisms** in re-expression of ER, PR, and HER receptors in **triple negative breast cancer**: effects of FDA approved epigenetic drugs and dietary agents

Scientific Speaker Series

CONNECTIONS TO REGULATORY SCIENCE

SEX IS NOT LOST IN SPACE

May 15, 2019 | 11:00 AM – 12:00 PM ET | WO Building 2, Room 2047 W

Saralyn Mark, MD
Former Senior Medical Advisor, NASA
Founder/President, iGANT®
Author, *Stellar Medicine: A Journey Through the Universe of Women's Health*

Registration Required.
<https://collaboration.fda.gov/sex-space/event/registration.html>
Seating is limited. Webcast available.

FDA Office of Women's Health Scientific Series

SEX DIFFERENCES IMPACT VACCINE EFFICACY: What You Need to Know

February 4, 2020
12:00 – 1:00 PM ET
CME/CPE/CNE Available

Exploring Sex and Gender – Connections to Regulatory Science

Drug Development Tools | DDTs

DDTs are methods, materials, or measures that can potentially facilitate drug development. FDA established qualification programs to support DDT development.

BIOMARKER INTEGRATION INTO DRUG DEVELOPMENT

**Drug Approval
Process**

**Scientific
Community
Consensus**

**Biomarker
Qualification
Program**

Note: These pathways do not exist in isolation and many times parallel efforts are underway within or between pathways. All share common core concepts, are data-driven, and involve regulatory assessment and outcomes based on the available data.

Facilitating Biomarker Development: Strategies for Scientific Communication, Pathway Prioritization, Data-Sharing, and Stakeholder Collaboration; Published June 2016, Duke-Margolis Center for Health Policy

Intial Targeted Engagement for Regulatory Advice on CBER producTs (INTERACT)

INTERACT Meetings

Meeting is an informal non-binding consultation with the Center for Biologics Evaluation and Research (CBER) at FDA.

An INTERACT meeting enables sponsors to obtain preliminary informal consultation for innovative investigational products at an early stage of development on issues that are not yet at the pre-IND meeting phase.

Advancing Alternative Methods at FDA

Alternative Methods Working Group (AMWG)

- Strengthen FDA's long commitment to promoting the development and use of new technologies and to reduce animal testing
- Discuss new alternative *in vitro/in silico/in vivo methods* across FDA
- Interact with U.S. Federal partners and other global stakeholders to facilitate discussion and development of draft performance criteria for such assays.

<https://www.fda.gov/science-research/about-science-research-fda/advancing-alternative-methods-fda>

How do we bring the science forward?

- Research
- Education
- Meetings
 - CPIMS, INTERACT, AMWG
- Drug Development Tools
- Sponsor Meetings with FDA as appropriate
