A rustle turns into a murmur, turns into a goosebump, into an ever-spreading garden of peaks + ~~thru~~ troughs, spiny + prickly + glistening in the early-morning. An energy awakens, moving itself through the deep, imperceptible disguised, until the moment it reveals itself in a ripple. A ripple that builds + forwards, becoming your next ride if only, if only, if only. A rustle, an energy, the feeling of your sit bones brushing on the fiberglass beneath it as you crane your neck + scour, searching + scanning the horizon but only with half attention. The other half - stored. The sport doesn't demand a monopoly on attention, doesn't command concern or even commitment to success, it merely the deep merely exists, being what it is, inviting restless souls to wade in and do the same within its soft, rocking caress: like a mama absentmindedly singing a lullaby, rocking baby until both trail off into a tranquil coexisting slumber.

fun!

FRIENDS

A microscopic view of various bacteria, including rod-shaped and spherical forms, many with long, thin flagella. The background is a dark, textured blue-green. The text "CEPACIA = SUPERBUG" is overlaid in white, bold, sans-serif font at the bottom.

DECLASSIFIED

A world map with a blue and orange color scheme. The continents are outlined in a darker blue. In the center of the map, the words 'WEALTH' and 'GAP' are spelled out using white, cylindrical letter tiles. The tiles are arranged in two rows: the top row spells 'WEALTH' and the bottom row spells 'GAP'. Each tile has a letter on its top and bottom face. The background is a textured blue, and the map is a lighter blue with orange landmasses.

IPATH

A person is performing a handstand on a sandy beach. They are wearing a black sports bra and black shorts with a white waistband. Their legs are straight and held together, pointing towards the sky. The background shows a blue sky with white clouds, a blue ocean with white waves, and a dark rock in the water. The person's head is resting on the sand, and their arms are also on the sand.

BECOMING
DR. SEUSS

7:36:01 PM

In 1968, my husband
and I were at a party where
the actress from our
favorite TV show at the time
was in Los Angeles. Meeting
me, our daughter, Marley,
had cystic fibrosis. I stood
there in shock, listening to
someone who - it took
minutes to realize - was
the actress from our
favorite TV show at the time
was in Los Angeles.
