

# Committee on the Use of Race and Ethnicity in Biomedical Research: Report Release Webinar

Public Webinar

October 31, 2024

## PURPOSE AND OBJECTIVES

A National Academies committee was convened to review existing guidance and provide recommendations to the scientific community about the use of race and ethnicity in biomedical research. On October 31, the committee will hold a public webinar about the newly released consensus study report's key messages and recommendations. Questions from the audience about the report are welcome.
