FRIDAY, MAY 24, 2024

PUBLIC SESSION VIRTUAL

Session Objectives

- Highlight recent discoveries and advances that have impacted the state of the science for Lewy body dementia (LBD), frontotemporal dementia (FTD), vascular dementia, limbic-predominant age-related TDP-43 encephalopathy (LATE), and mixed etiology dementias.
- Identify priority research areas specific to these related dementias that, if addressed, could lead to significant advances in prevention and treatment.

12:00 p.m. **Welcome and Review of Session Objectives**

Tia Powell, Committee Chair

12:10 p.m. **Committee Discussion with Subject Matter Experts**

Julie Schneider, Rush University Medical Center

Penny Dacks, The Association for Frontotemporal Degeneration

James Galvin, University of Miami Miller School of Medicine

James Leverenz, Cleveland Clinic Neurological Institute

1:30 p.m. **Adjourn Public Session**
