

Session 4: Practical Barriers II – Health Professional Education & Adoption

Lauren Hammer, MD, PhD
Research Fellow, Movement Disorders and Neuromodulation
University of California, San Francisco

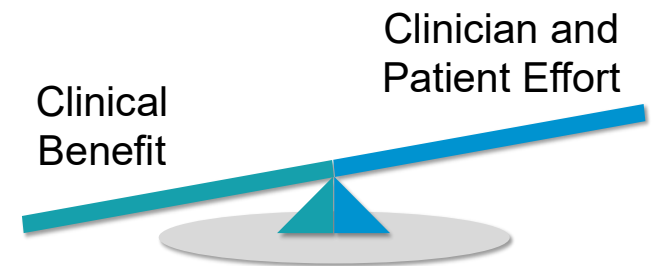

Manageable Clinician Workflows Needed to Introduce and Maintain Adoption of New Technology

Previous
Standard of Care

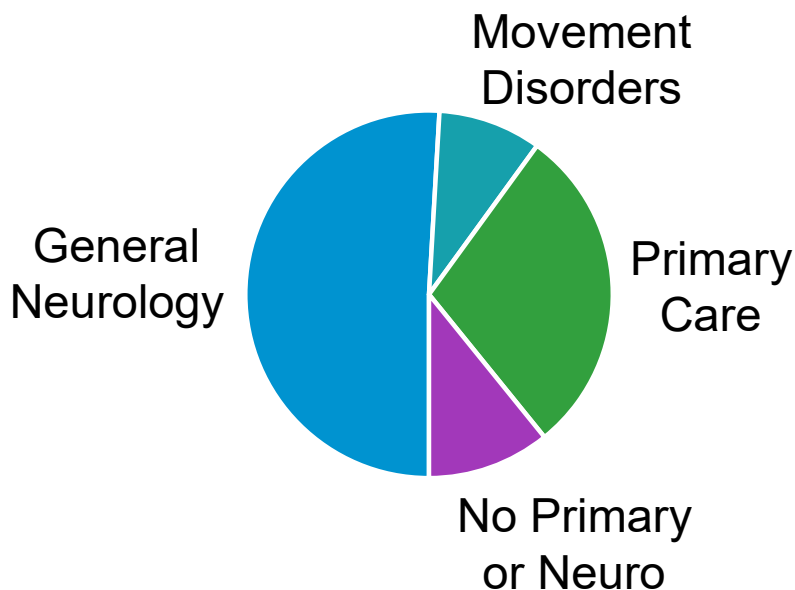

Effort to Learn and
Integrate New Technology

New Standard of Care

Partnering with Community Providers / Generalists

Where do patients with Parkinson's disease get care?

Pearson, et al. NPJ Parkinson's dis. 2023.

Role of Community Provider Partners:

- Identify who is appropriate for referral
- Co-manage during optimization of stimulation
- (Ideal / future goal) take over stable management of patients

Neurology residency is still heavily focused on acute-care neurology – Only 17% of residency training is required to be outpatient-focused
