

Harvesting the Scientific Investment in Prevention Science:

**A workshop of the IOM-NRC Forum on
Promoting Children's Cognitive, Affective,
Behavioral Health**

**First workshop highlighted
major successes in the field of
prevention.**

Since 1987, there has been an impressive increase in EBI.

Today's agenda aims to see what are the new opportunities for EBI.

- **Federal mandates by ACA & MH Parity**
- **Decreased federal prevention funding (Dept. of ED & SAMSHA)**
- **Substantial experience nationally in agencies at every level, with challenges**
- **Ongoing balance between improving public health & providing remedial services**

**We focus on bridge spanners,
harvesters of EBI experience, &
specialists with technology &
methodological innovations.**

Health care

Social welfare

Schools

Juvenile & Criminal Justice

What are the
ACTIONABLE initiatives
**that federal, state,
local agencies & the
research community
should prioritize?**

**In advance, thank you for your
contributions & experiences.**
