

The background of the slide is a light gray grid with several large, faint circles and squares overlaid. The text is centered in the lower half of the slide.

Population Health Research Priorities: Perspectives from the Field

Jenelle S. Krishnamoorthy, Ph.D.

September 30, 2015

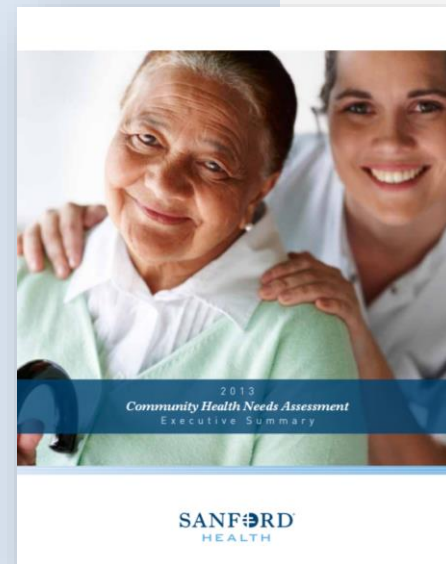

Merck and Population Health

Merck aims to discover and develop innovative products to address areas of unmet medical need that save and improve lives.

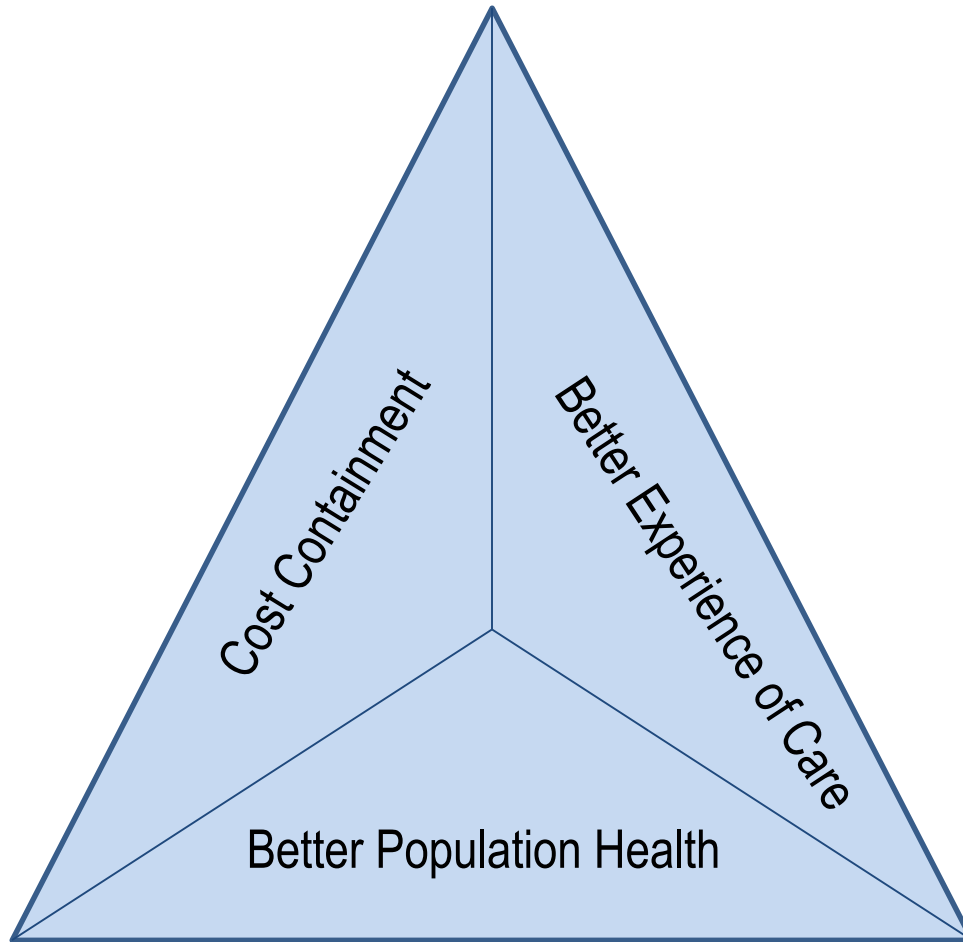

- Vaccines
- Merck for Mothers
- Diabetes
- Oncology
- Antibiotics resistance/Development of novel antibiotics
- Hepatitis C
- Alzheimer's

Transforming to a Health System that Creates Population Health

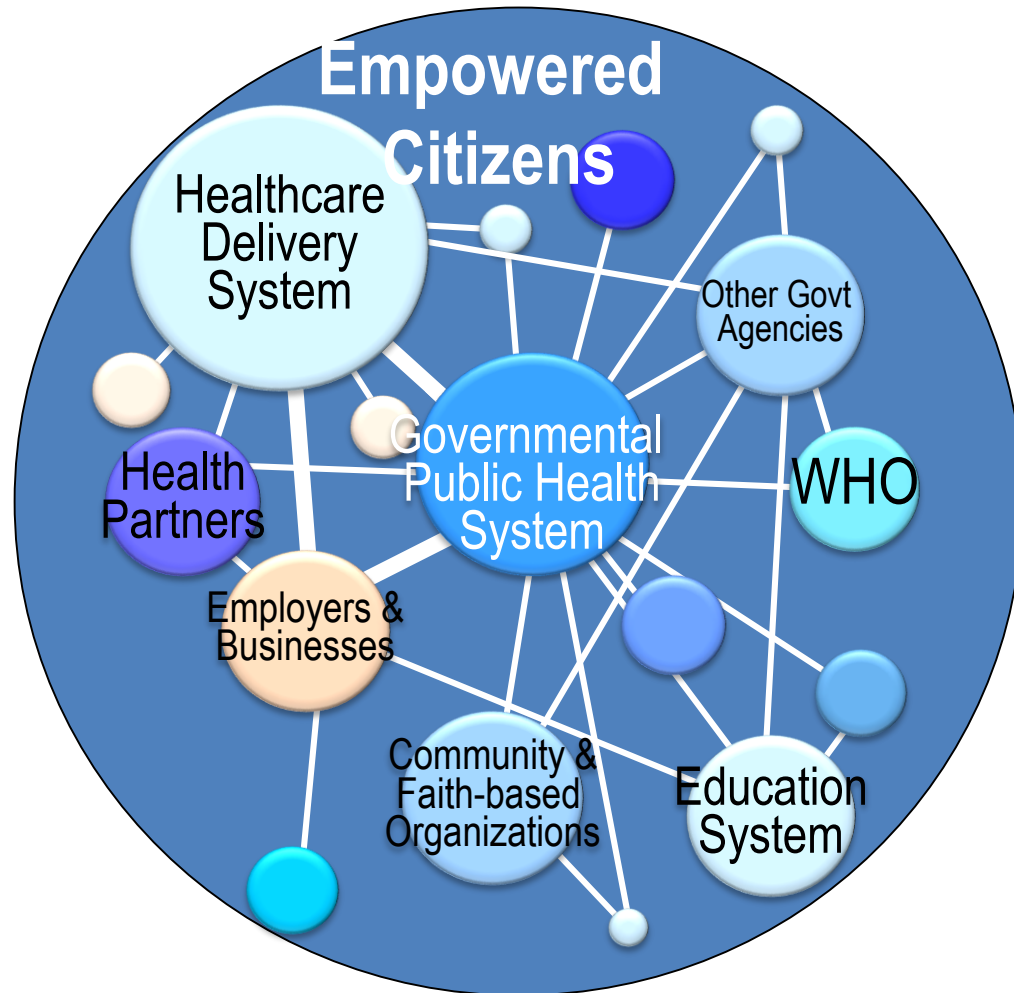

- Stakeholders have a shared vision of success and collaborate to achieve a compelling goal.
- Resources and rewards align with desired results.
- Results are measured and transparent.
- Information is shared.
- Innovation is encouraged.
- Learning occurs.
- People flourish and organizations prosper.

The Triple Aim

Integrated Population Health Network: Conceptual Model

“Health in all Policies” and “Health in all Places” to Create “Health for all People”!
