

## **Secondary-school mathematics: Looking ahead, an Israeli perspective**

### **Part 2 in the webinar series, “Moving Forward in the Midst of a Pandemic: International Lessons for Math Teachers”**

Hosted by the U.S. National Commission of Mathematics Instruction –  
National Academies of Sciences, Engineering, and Medicine

**A talk by Talli Nachlieli, Head, Mathematics Education Department,  
Levinsky College of Education (pictured below)**

This time of uncertainty has brought with it a need for quick changes in teaching and learning. Now, after initial reactions to the requirement for remote teaching, and towards the next year, we ask: what could, or perhaps should, be breached in classroom teaching to provide math students with rich learning opportunities? This question is asked in the context of vagueness regarding the environment in which learning would take place. In this talk, we will address this question from different perspectives - the ministry of education in Israel, teachers, teacher educators and researchers, as we all prepare for the coming year.

**Thursday, July 16, 2020 from 11:00 a.m. to 12:00 p.m. EDT via Zoom**

Registration for this webinar is free. To register, please visit our Eventbrite page:  
<https://www.eventbrite.com/e/secondary-school-mathematics-looking-ahead-an-israeli-perspective-tickets-112118882596>

Please also join us on Thursday, July 9, 11 am EDT for Part 1, featuring **Paul Drijvers**, Professor in Mathematics Education, Freudenthal Institute, Utrecht University (The Netherlands) and on Thursday, July 23, 11 am EDT, for Part 3, featuring **Salomé Martinez**, Director of the Laboratory of Mathematical Education, Universidad de Chile (Chile).
