DECLARATION OF RIGHTS AND PRINCIPLES TO TRANSFORM SCHOLARLY COMMUNICATION

To align our institutional policies and practices toward the goal of replacing subscription-based publishing with open access (OA), we propose that the University of California assert the following rights and principles when negotiating with publishers during journal license renewals:

1. **No copyright transfers.** Our authors shall be allowed to retain copyright in their work and grant a Creative Commons Attribution license of their choosing.
2. **No restrictions on preprints.** Our authors shall have the right to submit for publication work they have previously made available as preprints.
3. **No waivers of OA Policy.** Publishers shall not require our authors to provide waivers of our Institutional OA Policy as a condition for publishing our work.
4. **No delays to sharing.** Publishers shall make work by our authors immediately available for harvest or via automatic deposit into our Institutional OA repository or another public archive.
5. **No limitations on author reuse.** Our authors shall have the right to reuse figures, tables, data, and text from their published work without permission or payment.
6. **No impediments to rights reversion.** Publishers shall provide a simple process for our authors to regain copyright in their previously published work.
7. **No curtailment of copyright exceptions.** Licenses shall not restrict, and should instead expressly protect, the rights of authors, institutions, and the public to reuse excerpts of published work consistent with legal exceptions and limitations on copyright such as fair use.
8. **No barriers to data availability.** Our authors shall have the right to make all of their data, figures, and other supporting materials from their published work publicly available.
9. **No constraints on content mining.** Publishers shall make licensed materials open, accessible, and machine-readable for text and data mining by our researchers, at no additional cost and under terms that allow retention and reuse of results.
10. **No closed metadata.** Publishers shall make bibliographic records, usage metrics, and citation data for our authors freely available, easy to parse, and machine-readable.
11. **No free labor.** Publishers shall provide our Institution with data on peer review and editorial contributions by our authors in support of journals, and such contributions shall be taken into account when determining the cost of our subscriptions or OA fees for our authors.
12. **No long-term subscriptions.** Publishers shall provide our Institution with plans and timelines for transitioning their subscription journals to OA.
13. **No permanent paywalls.** Our Institution shall receive perpetual access for previously licensed content and back files shall be made freely available once a journal transitions to OA.
14. **No double payments.** Publishers shall provide our Institution with data on hybrid OA payments from our authors and such payments shall reduce the cost of our subscriptions.
15. **No hidden profits.** Publishers shall use transparent pricing for the services they provide our authors when levying article processing charges and other fees associated with publishing.
16. **No deals without OA offsets.** Our Institution shall only enter into publishing agreements that include offsets for OA publishing by our authors.
17. **No new paywalls for our work.** Work by our authors shall be made OA on the publisher's website as part of subscription terms for new journals.
18. **No non-disclosure agreements.** Publisher agreements with our Institution shall be transparent and shall not contain terms that prevent the sharing of their contents.

Authors Retaining Copyright And All Rights Therein Is A Key Motivator For Open Access Publishing

DECLARATION OF RIGHTS AND PRINCIPLES TO TRANSFORM SCHOLARLY COMMUNICATION

To align our institutional policies and practices toward the goal of replacing subscription-based publishing with open access (OA), we propose that the University of California assert the following rights and principles when negotiating with publishers during journal license renewals:

- 1. No copyright transfers.** Our authors shall be allowed to retain copyright in their work and grant a Creative Commons Attribution license of their choosing.
- 5. No limitations on author reuse.** Our authors shall have the right to reuse figures, tables, data, and text from their published work without permission or payment.
- 7. No curtailment of copyright exceptions.** Licenses shall not restrict, and should instead expressly protect, the rights of authors, institutions, and the public to reuse excerpts of published work consistent with legal exceptions and limitations on copyright such as fair use.

- ***3 out of 18 principles in the Declaration focus on copyrights for authors***
- ***Unanimously endorsed by UCOLASC, UCAF, UCAP, UCORP, UCACC, CCGA, UCFW, UCPB, and Academic Council, CoUL, and SLASIAC***

The OA Movement Has Promoted Creative Commons (CC) Licenses So Authors Can Retain Copyrights And Control How Their Work Gets Used

CC Denotes that the license is Creative Commons.

BY Means "by". End users must attribute and say who made the work.

NC Non-commercial. The work cannot be used for profit.

SA Share-alike. All derivatives/reuse must apply same CC license.

ND No derivatives. No changes or alterations can be made to the work.

- CC licenses only restrict what end-users may do under the license and not what the licensor (rights holder) can do.
- Licensors are always free to do whatever they want with their own works.
- One of the most liberal licenses is CC BY, which allows anyone to distribute, remix, adapt, and build upon the material in any medium or format, so long as proper attribution is given to the author.
- For discipline-specific reasons, some authors place "non-commercial" (NC) and/or "no derivatives" (ND) restrictions on what end-users can do with the work.

Authors Choose Different Creative Commons (CC) Licenses Based On Their Own Disciplinary Needs

- In 2021, up to 35% of UC authors selected CC BY-NC or CC BY-NC-ND licenses when publishing OA in gold and hybrid journals, which represents over 2300 articles (data from Unpaywall).
- Authors believe that CC licenses enable them to retain their rights.

Publishers Secure Rights To Publish And Disseminate A Work By Using License to Publish (LTP) Agreements

The Structure And Language Of License To Publish Agreements Confuse And Mislead Authors Who Often Do Not Realize They Are Asked To Give Away Rights

Authors retain copyright but in name only, since LTP agreements aim to transfer all rights held in copyright exclusively to the publisher.

THE LICENSE AGREEMENT

License of publishing rights

I hereby grant to *Journal Owner* an exclusive publishing and distribution license in the manuscript identified above and any tables, illustrations or other material submitted for publication as part of the manuscript (the "Article") in print, electronic and all other media (whether now known or later developed), in any form, in all languages, throughout the world, for the full term of copyright, and the right to license others to do the same, effective when the Article is accepted for publication. This license includes the right to enforce the rights granted hereunder against third parties.

Scholarly communication rights

I understand that I retain the copyright in the Article and that no rights in patents, trademarks or other intellectual property rights are transferred to the Journal. As the author of the Article, I understand that I shall have: (i) the same rights to reuse the Article as those allowed to third party users of the Article under the CC-BY-NC-ND License, as well as (ii) the right to use the Article in a subsequent compilation of my works or to extend the Article to book length form, to include the Article in a thesis or dissertation, or otherwise to use or re-use portions or excerpts in other works, for both commercial and non-commercial purposes. Except for such uses, I understand that the license of publishing rights I have granted to the Journal gives the Journal the exclusive right to make or sub-license commercial use.

LTP agreements typically ask authors to sign before the fine print appears.

B. LICENSE

...the Author and each Co-author hereby grants to the Owner, during the full term of the copyright and any extensions or renewals, **an exclusive license of all rights of copyright in and to the Contribution** that the Author and Co-author do not grant under the CC BY-NC-ND license, and all rights therein, including but not limited to the right to publish, republish, transmit, sell, distribute, modify, adapt, and otherwise use the Contribution in whole or in part in electronic and print editions of the Journal and in derivative works throughout the world, in all languages and in all media of expression now known or later developed, for commercial purposes, and to license or permit others to do so. In addition, the Author and each Co-Author hereby grants to the Owner, during the full term of copyright and any extensions or renewals, **the exclusive, worldwide, irrevocable and fully transferable right to use and exploit the Contribution in any manner**, including: the rights to reproduce, to distribute (for example in any book format or any digital format), to exhibit, and to make available to the public; the recitation performance, and presentation rights; the broadcasting rights; the rights of communication by video or audio recordings; the rights of communication of broadcasts and of works made available to the public....“Contribution” means the article submitted by the Author for publication in the Journal (including any embedded rich media) and all subsequent versions....**If the Contribution was shared as a preprint or as an accepted manuscript, the Author and each Co-author hereby grant to the Owner exclusivity as to all rights retained by the Author and by each Co-author in the preprint or the accepted manuscript.**

Publishers Only Need A “Limited” Or “Non-Exclusive” License To Publish And Authors Retain All Rights

Most native OA publishers and some society publishers use an appropriate “non-exclusive” LTP agreement

OPEN ACCESS AGREEMENT: CC BY-NC-ND

License of Publishing Rights

The Owner hereby grants to SAE International a non-exclusive publishing and distribution license in the manuscript identified above and any tables, illustrations, or other material submitted for publication as part of the manuscript (the “Article”) in all forms and media (whether now known or later developed), throughout the world, in all languages, for the full term of copyright, effective when the Article is accepted for publication. This license includes the right to enforce the rights granted by this license against third parties and to sublicense such rights.

Permission to Publish

In order to facilitate dissemination of the Article, the Owner grants to SAE, during the full term of the Owner’s copyright and any extensions or renewals, a non-exclusive license to publish the Article, and all rights therein, including but not limited to the right to publish, republish, transmit, sell, distribute, and otherwise use the Article in whole or in part in electronic and print editions of the Journal and in derivative works throughout the world, in all languages and in all media of expression now known or later developed and to license or permit others to do so.

RECOMMENDATIONS AND ACTION ITEMS

- Institutions and publishers should support the retention of copyright and all rights therein by authors.
- License to publish (LTP) agreements should only restrict what end-users may do under the license and not what the author (licensor/rights holder) can do.
- Open access agreements between institutions and publishers should stipulate that authors only grant “limited” or “non-exclusive” licenses to publishers.
- Liberal Creative Commons (CC) licenses (e.g., CC BY) should be applied as the default choice in publisher workflows, but if authors choose licenses that restrict commercial and/or derivative uses of the work (e.g., CC BY-NC, CC BY-ND, CC BY-NC-ND) then those licenses should function as originally intended with authors always free to do whatever they want with their own work.
- If publishers do not voluntarily make changes to their LTP agreements then Federal Agencies should invoke the “Government Use License” (2 C.F.R. §200.315(b)), which states that, “The Federal awarding agency reserves a royalty-free, nonexclusive and irrevocable right to reproduce, publish, or otherwise use the work for Federal purposes, and to authorize others to do so.”
