Clarity

Confidence

Commitment

Capacity

Courage

Collaboration

- **Discuss the issues – what do you care about?**
- **Define where you want the Region to be 50 to 100 years from now. What community do you want to leave to your children?**
- **Don't let the realities of today cloud your vision of tomorrow. A lot will change – don't be confined by the little things.**
- **Begin to identify what you might be able to change in the short-term.**
- **Remember – sustainability is about changing problem solving techniques and decision-making processes.**

Sustainability is....

- The capacity to endure.
- To continue in existence

Sustainability is System Thinking

Business

Environment

People

**How do we run the community
system to provide a better place
to work and live?**

Greensburg
