

Roundtable on Science and Technology for Sustainability

December 13, 2024

All times are US Eastern Time

Virtual

ZoomGov Meeting

Description: Artificial intelligence (AI) has emerged as a transformative technology with the potential to accelerate progress toward sustainability goals; however, its deployment in sustainability also introduces complex challenges. This session will focus on an overview of the use of AI in supporting sustainability, as well as opportunities for integrating AI into sustainability practices. Discussions will also include AI's potential to accelerate progress on the Sustainable Development Goals, including a vision for a sustainable future beyond the 2030 Agenda for Sustainable Development.
