

ACCELERATING TO THE NAVY & MARINE CORPS AFTER NEXT

MARINE BOARD SPRING MEETING

6 April 2022

Dr. Thomas Fu. SES
Mission Capable, Persistent and
Survivable Naval Platforms Department

Operational Context

Cyber and Communications Assets

- 40 Navy and 13 USMC CMF Teams (Cyber Mission Force)
- 2 NCTAMS (Naval Computer and Telecommunications Area Master Station)
- 7 NCTS (Naval Computer and Telecommunications Station)

Report to Congress on the Annual Long-Range Plan for Construction of Naval Vessels for Fiscal Year 2022

Potential Naval Platform Ranges

Platforms	Naval Platform Ranges	
	Low	High
Aircraft Carriers	9	11
LHA/LHD	8	9
Large Amphibious Warfare Ships (less LHA/LHD)	16	19
Small Amphibious Warfare Ships ¹	24	35
Large Surface Combatant	63	65
Small Surface Combatant	40	45
Attack Submarines / Large Payload Submarine	66	72
Ballistic Missile Submarines	12	12
Combat Logistics Force ²	56	75
Support Vessels	27	29
Total Battle Force Ships	321	372
Uncrewed Surface Vessels	59	89
Uncrewed Undersea Vessels	18	51
Total Uncrewed	77	140
Total Battle Force Ships + Uncrewed	398	512

Naval Research Enterprise Budget

FY22 DoN Budget Request \$211.7B

Basic Research \$602M	Applied Research \$976M	Advanced Technology Development \$778M	
--------------------------	----------------------------	--	--

Naval Research Enterprise => \$2.64B
11.5% of FY22 \$22.6B RDT&E,N Budget

NRE Portion of BA 04, BA 06, BA 07
 \$284.1M

NRE Portfolio Management

*“...**plan, foster, and encourage** scientific research in recognition of its paramount importance as related to the maintenance of future naval power, and the preservation of national security....” (P.L.588 establishing ONR in 1946)*

Von Kármán at
the [Caltech Jet Propulsion
Laboratory](#) in 1950

*“Scientists study the world as it is, engineers
create the world that never has been.”*

Theodore von Kármán*

This is essentially ONR’s mission. We study the world in which we live, because we must operate, function, and win in that world. But we also create the Navy that has never been. ***This is exactly how we reimagine Naval Power.***

* an engineer who received the first National Medal of Science in 1962

SECNAV Strategic Guidance

“Since my confirmation as the 78th Secretary of the Navy, I have characterized the most pressing challenges facing the Department of the Navy as the **“Four Cs”**: **China**, **Culture**, **Climate Change**, and **COVID**. The People’s Republic of **China** represents the **pacing challenge** against which we must plan our warfighting strategies and investments. Cultural challenges that we must tackle include confronting sexual assault and harassment, **promoting diversity, equity, and inclusion**, preventing suicide, and demanding integrity and accountability across our naval leadership. **Climate change poses a rapidly intensifying spectrum of risks** to our operating environment, our allies and partners, and our planet. And **COVID has posed an unprecedented test of the resilience** of our people, their families, and our health system. We must tackle these Four Cs with a sustained sense of urgency and a strong bias for action.”

As President Biden stated in his March 2021 Interim National Security Guidance, “our world is at an inflection point.” In the President’s words, **“The United States must renew its enduring advantages so that we can meet today’s challenges from a position of strength.”** The Navy-Marine Corps Team is one of America’s unmatched enduring advantages, and will be a vital part of realizing the President’s vision.

Strategic Guidance

“New and converging technologies will have profound impacts on the security environment. Artificial intelligence, autonomy, additive manufacturing, quantum computing, and new communications and energy technologies could each, individually, generate enormous disruptive change.”

Executive Order 14008:
Tackling the Climate Crisis at Home and Abroad

“Ensure the DOD can operate under changing climate conditions, preserving operational capability and enhancing the natural and man-made systems essential to the Department’s success”

Developing a Diverse STEM Workforce

Blue Integrated Partnerships (BIP)

One single entity cannot solve the inequality gap and lack of diversity in STEM fields, alone - we must forge key strategic partnerships at multiple levels. We propose a system of systems approach to change the culture at each local institution within the ecosystem but that can also be replicated.

KICK OFF MEETING FOR BLUE INTEGRATED PARTNERSHIPS CONSORTIUM

On Dec 10th 8:30 AM to 4:00 PM (Eastern Time)

Discussion on

**Sustainability &
Climate change**

**Health &
Human performance**

**Graduate school
opportunities**

Cyber Security

VISION: TO ATTRACT, MENTOR & SUPPORT THE UNTAPPED INCLUSIVE TALENT OF THE 21ST CENTURY WORKFORCE, READY TO SOLVE THE BIG CHALLENGES OF TOMORROW AND BUILD A TRANSFORMATIONAL ECOSYSTEM OF NATIONAL SECURITY.

Summer Institute for Sustainability & Climate Change

Building & Mentoring a Diverse Workforce Ready to Solve The Grand Challenges of 2050!

When?

- June 20 – August 1, 2022. On-campus Experience.

Audience

- K-12 students, Undergraduate, Graduate Students, High School Students, and K-12 Teachers.
- First Generation in College, Minority, Women, LBGT are highly encourage to apply. The nation cannot afford to miss any talent.

Benefits

- Earn a Certificate in Sustainability & Climate Change
- K-12 Students get a free laptop
- Acquire skills required for your next phase of career.
- Funding & unique opportunities from ONR-Navy, NASA, Industries, HBCUs, Hispanic serving institutes and Purdue.
- Scholarship: Stipend, Food-housing included and fun activities.
- Work with world-class Professors, then and have the choice to train like Marines. **Yes bring your Body & Mind to the next level!**
- Publish a Paper, Scholarships, Awards for Best Presentations at Conference.

Application

Complete short application form and include 2 pages resume →

- (1) Aging infrastructure: As of 2022, the average age of NRL DC buildings is **67 years**.
- (2) Current Facility Recapitalization Rate is **152 years**.
- Department of Defense (DoD) goal is 67 years.
- (3) Competitiveness of military construction (MILCON).
- Only 4 MILCONs have been authorized for the NRL over the past 2 decades.
- (4) Budget restrictions, decision models, and other external controls have limited lab/facility conditions & recovery or improvement.
- (5) Technology demands straining the capabilities and capacities of current buildings.

DoD Climate Adaptation Plan

Current ONR programs address all 5 LOEs

Digital Twin Science and Technology

ONGOING INITIATIVES

1. Developing technology to turn Navy's large data sets into useable knowledge to enable and expand the warfighting advantage.
2. Continuous analytical fusion of data, physics-based models, and machine learning (ML) to prescribe multiple, future representations of the platform and its environment.
3. Develop methods for autonomous command and control of a naval platform's power distribution system.

WHY THIS IS IMPORTANT

1. Having a tool to help identify the critical issues in a timely fashion to increase mission readiness and operational availability.
2. Apply AI/ML techniques to recognize deviations from expected operational conditions to prevent failures.
3. Improving the ability to provide protection against large power fluctuations and increase platform survivability.

Data and Model Based Component and Subsystem Measurement and Analysis

Real-Time Data Compared to Historical and Model Data To Provide Actionable Information for Decision Makers

Subsystem Information is Aggregated to Provide Increased Platform-Level Awareness

TRANSITION OPPORTUNITIES

1. Digital twin technology supports various power and energy programs, both manned and unmanned
2. Identify and mature digital twin technologies and capabilities that they can be operationalized for use on existing and future platforms
