

# Data Infrastructure for Measuring the Care Economy

*Katherine Miller*

*Assistant Professor, Department of Health Policy  
and Management, Johns Hopkins University*

# Data Sources

## Family Caregivers

- Health and Retirement Study
- National Health and Aging Trends Study + National Study of Caregiving
- American Time Use Survey
- AP-NORC Surveys
- Veterans Health Administration electronic health records, administrative claims, survey data, and semi-structured interviews

## Direct Care Workers

- American Community Survey
- Current Population Survey
  - Annual Social and Economic Supplement
- Occupational Employment and Wage Statistics
- Quality Workforce Indicator
- Statistics of US Business
- Payroll-Based Journal
- State-based Electronic Visit Verification (EVV) systems

# Key Take-Aways

Inconsistent identification and definition of caregivers (both paid and unpaid)

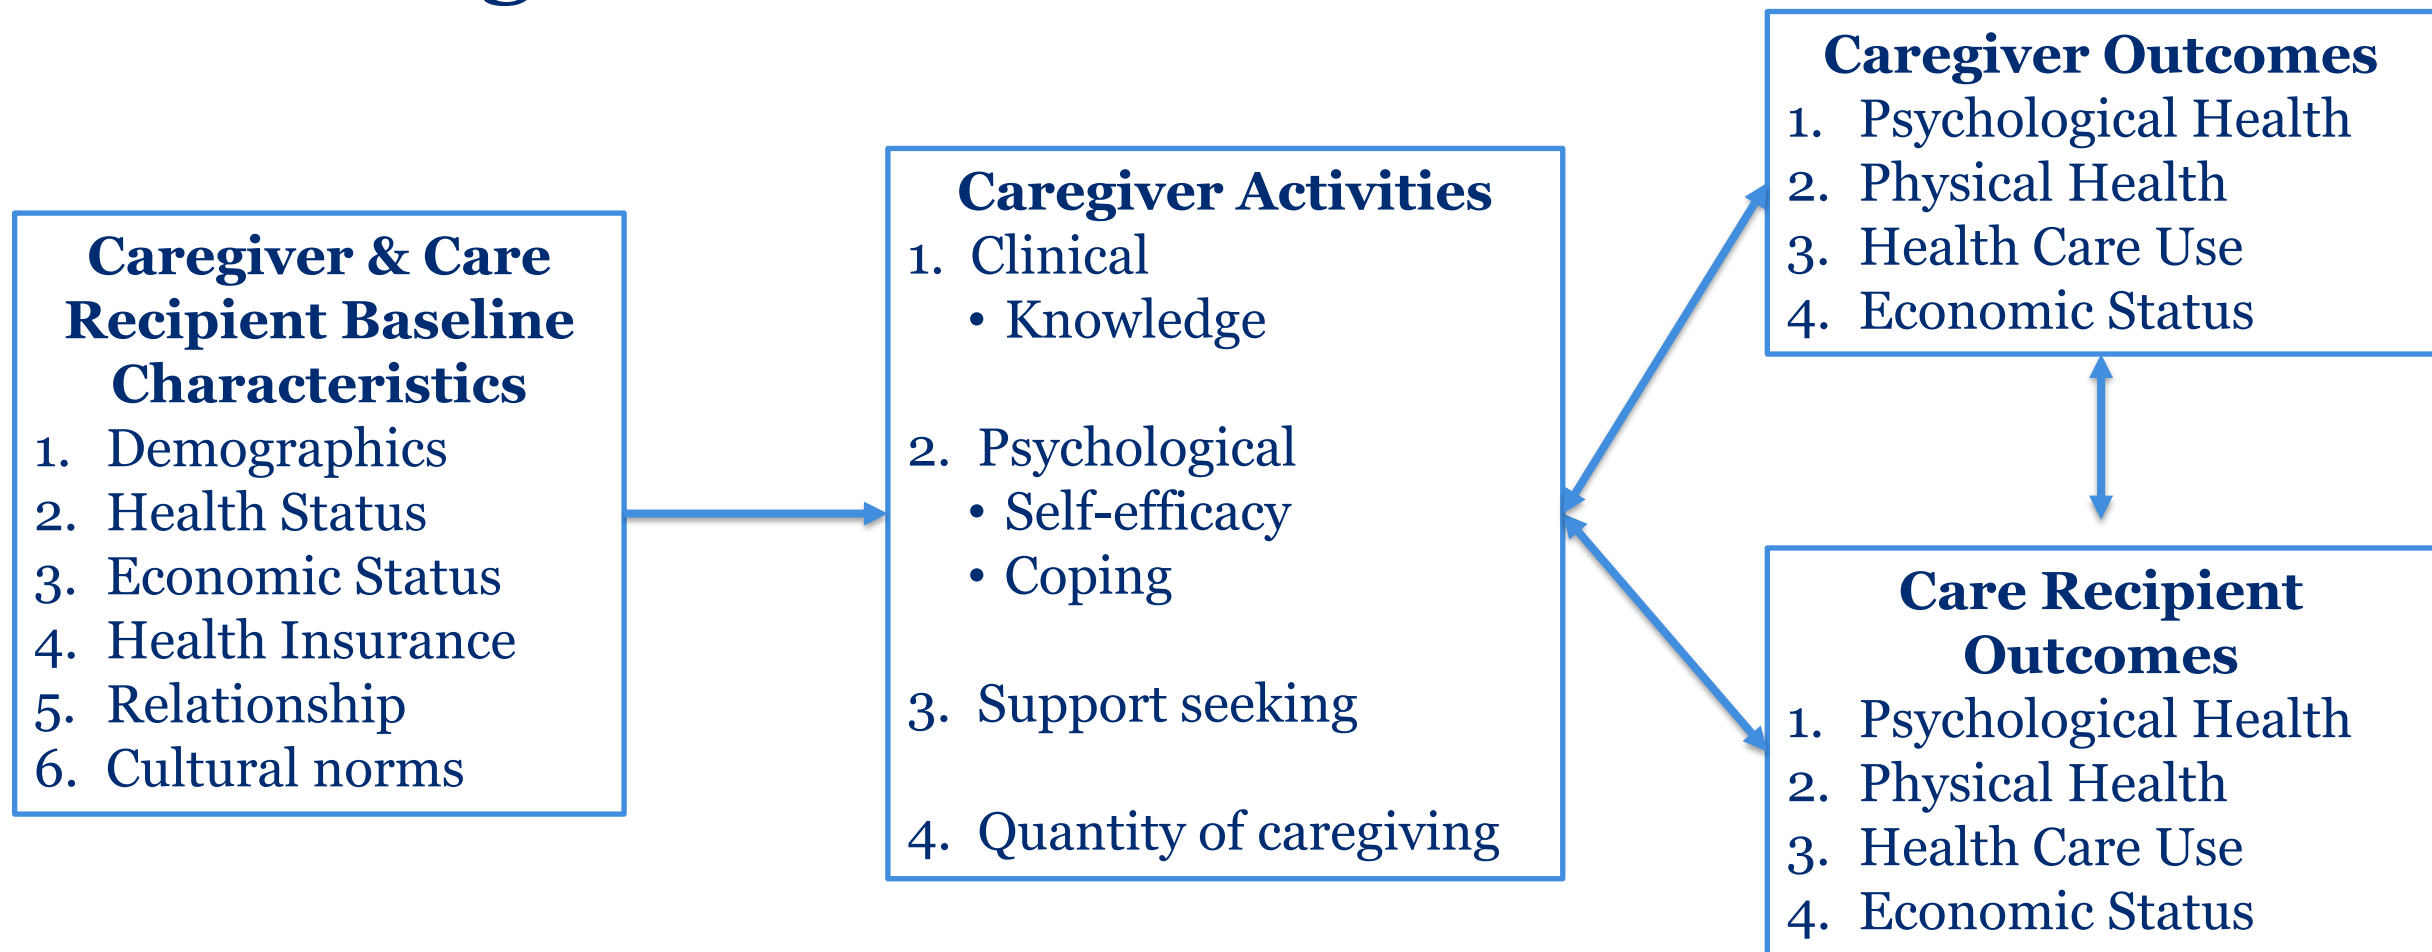

Small sample sizes

Limited data linkages to caregiver assessments/needs and patient outcomes

# Challenges

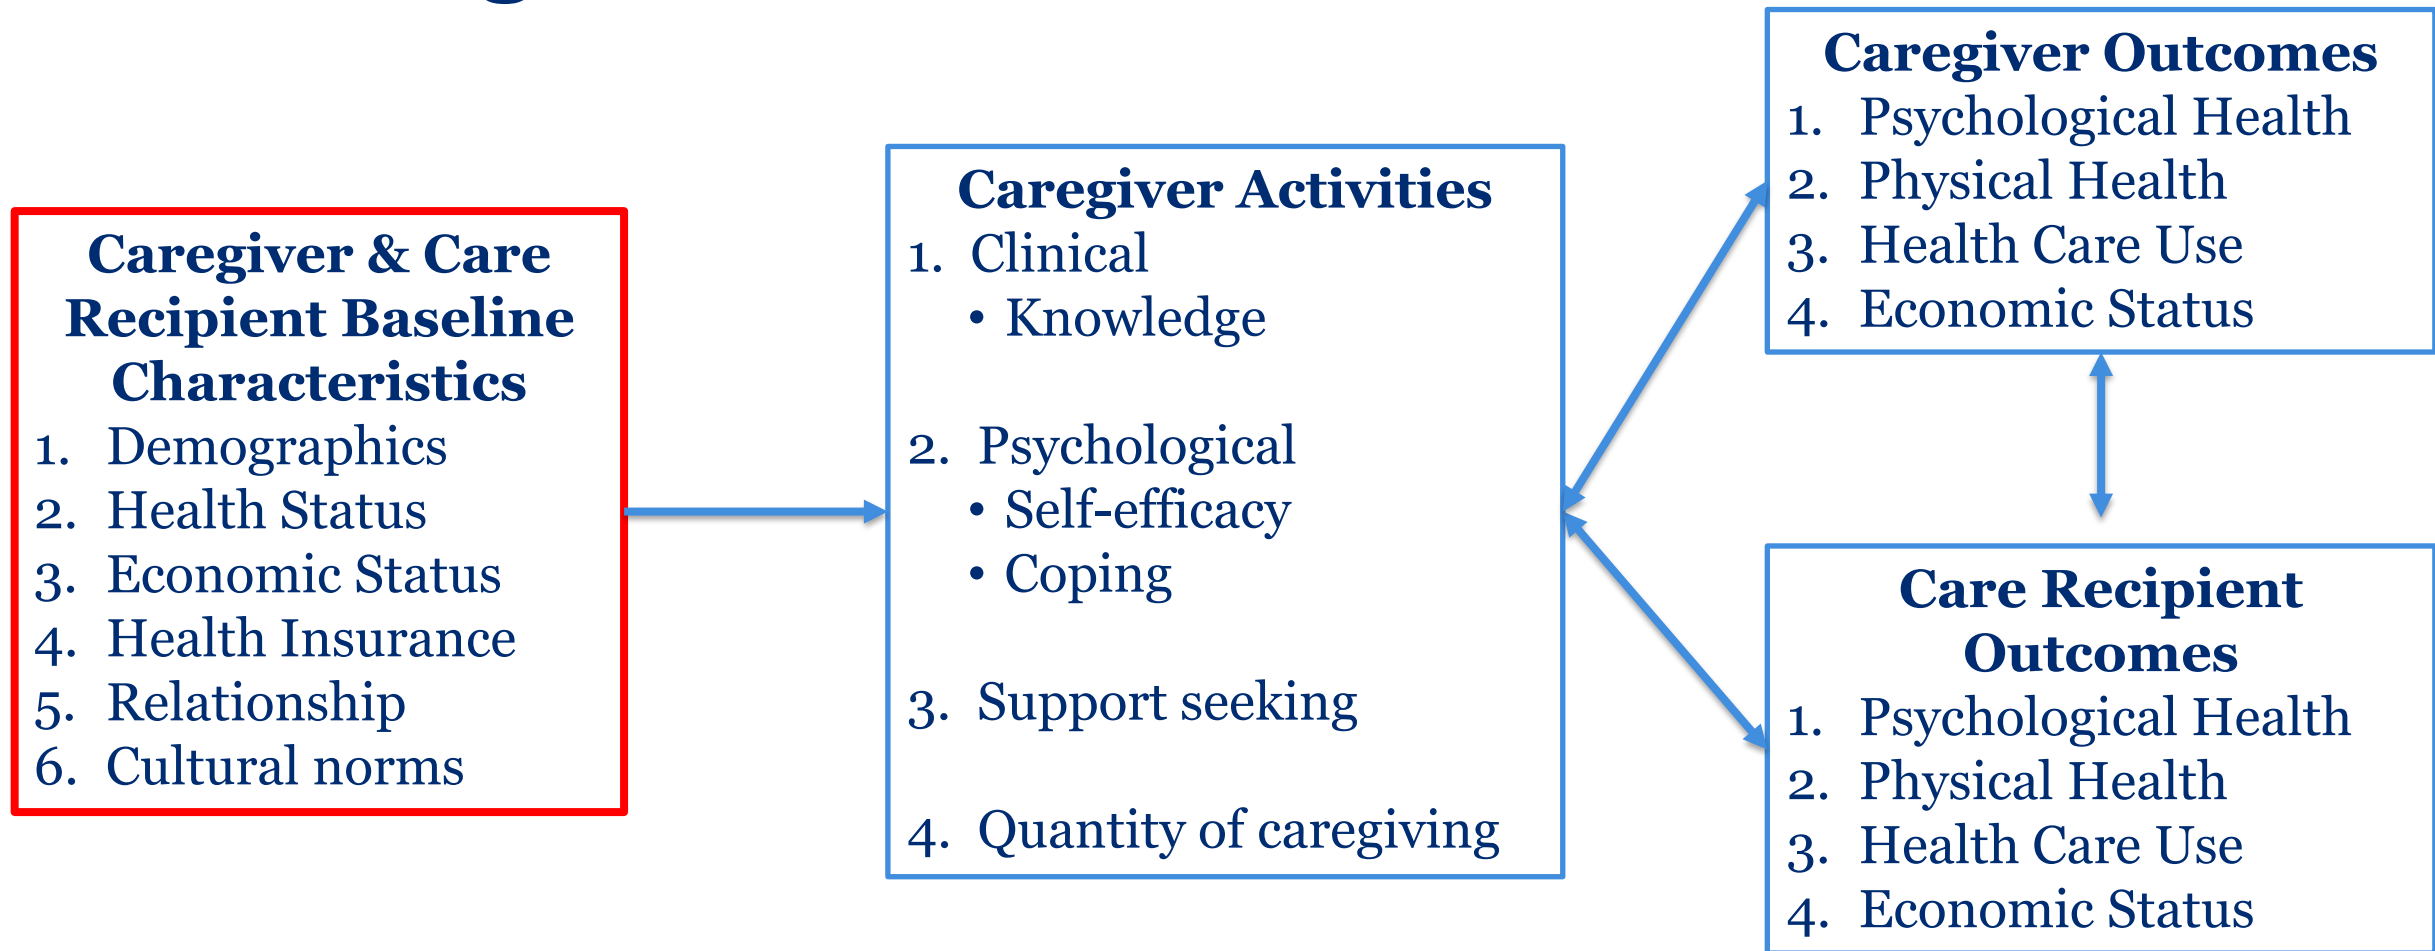

Adapted Organizing Framework for Caregiver Interventions

Van Houtven, C.H., Voils, C.I. & Weinberger, M. An organizing framework for informal caregiver interventions: detailing caregiving activities and caregiver and care recipient outcomes to optimize evaluation efforts. *BMC Geriatr* 11, 77 (2011). <https://doi.org/10.1186/1471-2318-11-77>
