Training

- F-1 OPT (STEM Ext.)
- J-1 visa

Work

- H-1B (cap)
- H-1B (cap exempt)
- O-1

**Permanent
Residency**

Green card

- EB-1 (A,B,C)
- EB-2 (PERM/NIW)
- EB-3

International scientists regularly
leverage creativity amid barriers to
design diverse career paths

STEM PhD to university administration: testing limits to expand possibilities

PhD, University of Georgia (F1 visa)
Postdoc, Sloan Kettering Cancer Center
(academic H1B)

PhD Professional
Development
Princeton University,
University of Virginia
(H1B, EB2)

PhD Professional
Development
Princeton University (EB2,
EB1-permanent resident)

STEM PhD to business of science: securing immigration stability for career flexibility

Leon (Jun) Tang,

Business Development, Venture Capital,
Entrepreneur

Emmanuel Toroitich

Innovation Postdoc, Life Science Consulting

STEM PhD to science policy: tweaking variables to find viable paths

Sanjana Mukherjee,
Global Health Policy

Omanjana Goswami,
Food & Environmental Policy

Global mobility for career independence and better quality of life

Shyamtanu Datta

U.S. to EU

Irina Fillonova

U.S. to Japan

International scientists are assets
and the world is calling....

Will the U.S. continue to attract and
retain global STEMM talent, and
ensure they thrive and succeed in
diverse careers?
