

SECTOR ACTIONS TO DRIVE AN EJ/CJ AGENDA THAT PRIORITIZES HUMAN HEALTH & WELL-BEING

ACTION/SECTOR

INDUSTRY

GOVERNMENT

ACADEMIA

PLANNING

Provide financial support to local governments to develop the appropriate modeling for climate planning

Use screening tools developed by academics to prioritize and focus resource distribution

Provide granular data to educate industrial partners on actual impact/provide gov't information to create stronger policy

DATA CAPTURE & USE

Work with academia to gather data that quantifies the layers of vulnerability in communities

Open channels for citizen scientific data to drive policy formation

Equity-focused research activities purposed to provide support & direct response during a crisis

ENGAGEMENT

Create the opportunity to hear and support action around community-generated solutions

Convene cross-sector stakeholders, including public health practitioners at every table

Collect and elevate stories and voices of impacted communities to inform industrial and gov't policies

SCOPING

Take time to understand the community context

Acknowledge the existing stressors and what functions are exacerbating injustice

Climate research agendas should be a balance of discovery and power-sharing with community scientists.

PEOPLE

Shape the agenda. Demand Accountability. Centered in the Policy Solutions
