

# Advancing Data Sharing to Strengthen One Health Effectiveness: Series Synthesis and Paths Forward

Thursday, January 22, 2026 | 12:30 PM – 2:00 PM ET

## BACKGROUND

---

The One Health Action Collaborative (OHAC) webinar series on “Advancing Data Sharing to Strengthen One Health Effectiveness” explores barriers, success stories, and potential future actions to advance data sharing through a One Health lens.

The purpose of this final webinar is to:

- Reflect on past webinars, success stories, and case examples to examine how cross-sector engagement and collaboration can realize One Health data sharing.
- Identify best practices, analytical tools, and methods that enable secure data access and integration providing interoperability and critical, near real-time, trustworthy information needed by subject matter experts and decision makers.
- Discuss data sharing strategies that address special needs and concerns from human, animal (wild, captive, and domesticated species), plant, and environmental domains to enable and inform One Health prevention, preparedness, and response activities.
- Highlight lessons learned along with current and potential solutions for addressing ambiguities around data sharing governance, policy, and security.

## AGENDA

---

- 12:30 PM**      **Welcome and Webinar Series Recap**  
**Tracey Dutcher**, *One Health Action Collaborative Vice-Chair*  
U.S. Department of Homeland Security
- 12:40 PM**      **Current Actions and Approaches**
