

Fighting the Infodemic:
A Social-Ecological Review of Tools and Approaches

Image source: 1st WHO Infodemiology Conference

Annie Sundelson, MSc

Methods

- We leveraged a database* of infodemic management tools and approaches developed for a project funded by CDC
- Tools and approaches in the database were drawn from:

Academic literature

Gray literature

State and local health department websites

Key informants

^{*}Database is in development and not yet published

Social-Ecological Model

Institutional/ Structural

Interpersonal/ Community

Individual

Resiliency

Information

Institutional/Structural

- Resources & standards for journalists/fact checkers
- Managing academic/scientific literature
- Resources for infodemic researchers/research
- · Resources for infodemic managers
- Social media regulation
- Policy/legislation

Interpersonal/Community

- Resources for public health communicators
- Community engagement

Individual Resiliency

- · Enhancing information literacy
- Prebunking/Inoculation

Information

- Amplifying factual information
- Filling information voids
- Debunking or refuting circulating false information
- Information tracking
- Credibility/verification/detection

Information-Level Approaches

Amplifying Factual Information

(Dear Pandemic)

Filling Information
Voids

(Google WHO SEO partnership)

Debunking False Information

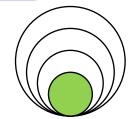

(#CoronaVirusFacts Alliance)

Information Tracking

(WHO EARS Platform)

Verification, Credibility, and Detection

(Botometer)

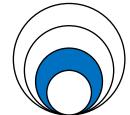

Individual Resiliency

Enhancing Information Literacy

- Science/health literacy (SDC Health Dept. "Finding Credible Sources of Information")
- Digital/media literacy (Cyber Citizenship Hub)
- Information literacy in general (CRAAP Test)

Prebunking/ Inoculation

- Against anticipated false information (van der Linden et al., 2017)
- Against common tactics of deception (GoViral!)

Interpersonal/Community Approaches

Resources for Public Health Communicators

- Traditional public health communicators (PHCC's communication resources)
- Non-traditional public health communicators (COVID-19 Misinformation Toolkit for Kids)

Community Engagement

- Identifying and utilizing trusted messengers (VYF's SQUADTM)
- Hard-to-reach, vulnerable, and/or marginalized communities (Live Chair Health)

Institutional/Structural Approaches

Resources for Journalists, Fact Checkers

(Global Health Crisis Reporting Forum)

Managing Academic, Scientific Literature

(COVID Contents Initiative)

Resources for Infodemic Managers

(WHO Infodemic Manager Training)

Resources for Infodemic Research

(Mercury Project)

Social Media Regulation

(Meta's COVID-19-related policies)

Policy & Legislation

(Health Misinformation Act)
