The Pew-MacArthur Results First Initiative: INVESTING IN PROGRAMS THAT WORK

Gary VanLandingham January 21, 2016

The Policy Challenge

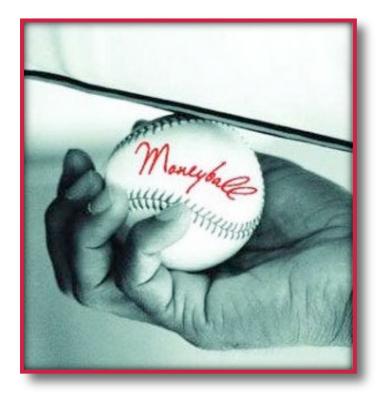

- Though policymakers strive to make strategic choices, the process often relies on inertia and anecdote
- Governments have very limited data on:
 - What programs they fund
 - What they accomplish
 - How they compare
- Results First Solution: bring more systematic evidence into the process

Results First

- Focuses on "What Works" programs shown to be effective by rigorous research
- Enables policymakers to determine whether current programs are evidence-based and if benefits justify their costs
- Built on approach pioneered by WSIPP

The Results First Approach

Identify currently funded programs and assess evidence of effectiveness

Conduct cost-benefit analysis to compare returns on investment

Help policymakers target funds to evidence-based programs

Goal: Achieve dramatic improvements without increased spending

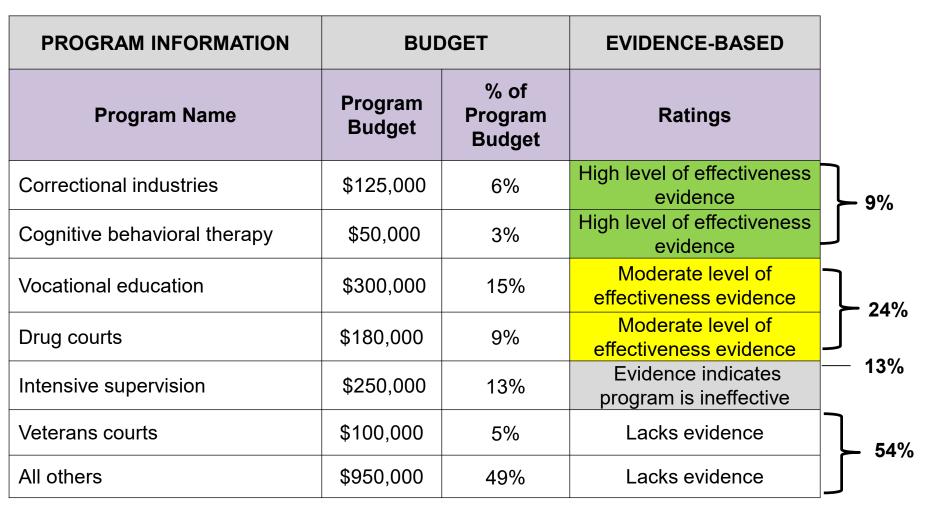

Aggregate Program Outcome PEW Evidence: RF Clearinghouse Database

Policy area	Intervention	Blueprints	CEBC	Coalition	Crime Solutions	NREPP	PPN	WWC	WWR
Substance abuse	Active Parenting of Teens: Families in Action		•		•	•			
Substance abuse	Adolescent Community Reinforcement Approach								
Juvenile justice	Adolescent Diversion Program (NY)				•				
Juvenile justice	Adolescent Diversion Project								
Child welfare	Adolescent Parenting Program	Clearinghouse: CrimeSolutions.gov Intervention: Adult boot camps Evidence Rating: No effects practice							
Mental health	Adolescents Coping with Depression						Learn me	ore 🔿	
Adult criminal justice	Adult boot camps								
Adult criminal justice	Adult drug court (Guam)				•				
Adult criminal justice	Adult drug courts								
Adult criminal justice	Adult drug courts (OR)

MacArthur Foundation

Develop Program inventories and Assess P = P = P = P**Evidence of Effectiveness**

MacArthur

Foundation

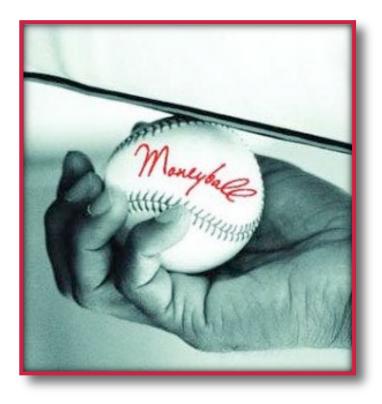

Rank Programs by Return on Investment

ADULT CRIMINAL JUSTICE PROGRAMS	COSTS	BENEFITS	BENEFIT TO COST RATIO					
Cognitive behavioral therapy	\$431	\$10,095	\$23.42					
Vocational education	\$1,645	\$19,594	\$11.91					
Correctional industries	\$1,485	\$6,818	\$4.59					
Drug courts	\$4,951	\$15,361	\$3.10					
Intensive supervision (surveillance only)	\$4,305	-\$1,139	-\$0.26					
JUVENILE JUSTICE PROGRAMS								
Aggression Replacement Training (state institutions)	\$1,575	\$16,827	\$10.68					
Functional Family Therapy (probation)	\$3,406	\$29,026	\$8.52					
Drug courts	\$3,275	\$8,110	\$2.48					
Multidimensional Treatment Foster Care	\$8,232	\$20,065	\$2.44					
Scared Straight	\$67	-\$12,319	-\$183.87					

Source: Based on WA State data

Use Policy Levers to Target Funds to High ROI Programs

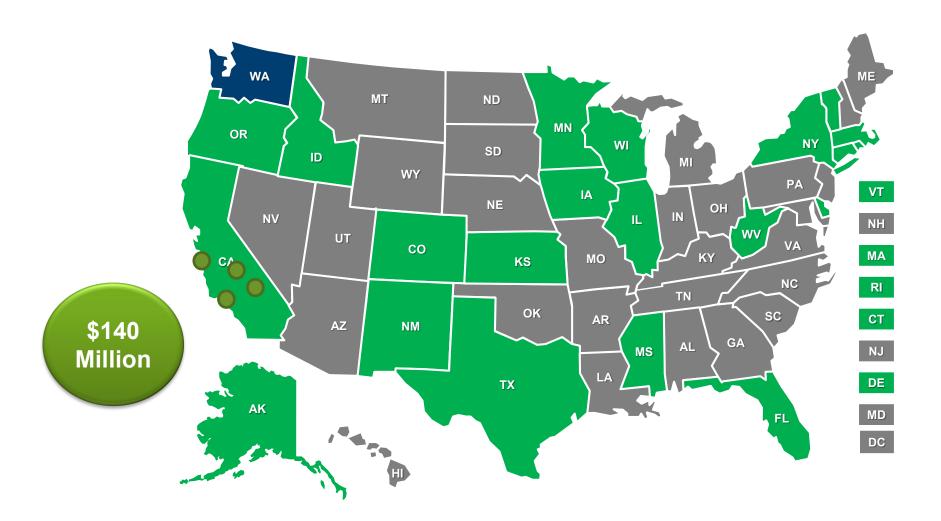

- Establish evidence definitions
- Mandate program inventory and evidence assessment

MacArthur Foundation

- Require funding requests to pass evidence screen
- Create preferences for evidence-based, high ROI programs

Participation in Results First

Lessons Learned:

- It must be <u>easy</u> for policymakers to access and use evidence
 - Evidence must be curated and aggregated
 - Tools need to utilize curated evidence on portfolio-wide basis
 - Budget/policy offices must incorporate evidence tools into their routine work
 - Policy levers should create preferences for evidence-based solutions (but allow for <u>tested</u> experimentation)

Lessons Learned:

- Leaks in evidence pipeline must be plugged
 - More evaluations are needed
 - Evaluation standards should be tightened (rigor, disclosure)
 - "Open evaluation portals" should be created
 - Clearinghouses should adopt more standardized terminology & protocols
