# Presentation to
National Academy of Science, Engineering and Medicine
Maryland Primary Care Program
Successful State Innovation
Integrating Primary Care and Public Health

23 March 2022

Maryland Primary Care Program, 2019- 2022

PARTICIPANTS	2022	% increase since 2019
Practice sites	545**	43.42%
Providers in MDPCP	~2,100	~40%
FFS beneficiaries attributed	374,000	70%
Marylanders served	over 4,000,000*	~ 33.3%

545 sites – 7 FQHC organizations represent 44 site locations (508 official participants)

*The Annals of Family Medicine, 2012

MDPCP's Practice Transformation

Access & Continuity - 24/7 access to care team | Expanded access, including telemedicine

Care Management - Risk-Stratification | Transitional Care Management | Longitudinal, Relationship-Based Care Management | Hospital & ED follow-up | Comprehensive Medication Management

Comprehensiveness & Coordination - Specialist Coordination | Behavioral Health Integration via SBIRT & Collaborative Care | Social Needs Screening & Referral

Beneficiary & Caregiver Experience - Patient Family Advisory Councils | Advance Care Planning

Planned Care for Health Outcomes - Continuous Quality Improvement | Advanced Health Information Technology | CRISP
Strategically Enhancing Primary Care

INCREASE IN PRIMARY HEALTH CARE **INVESTMENT**

- Medicare average PBPM increased to ~$62 PBPM
- Broad span with ~66% of all eligible primary care practices in multipayer program
- In kind contributions from State support

PRIMARY HEALTH CARE **DASHBOARDS** ON CRISP

- Consistent monthly updates, including utilization data parsed by demographics
- AI predictive tools to identify patients at risk for avoidable hospital events
- Hospital and ED Event Notification System and clinical info access

RISK ADJUSTMENT AND **EQUITY**
- By HCC score and ADI (HEART Payments)
- COVID-19 Vulnerability Index, ADI directed HEART payments
- Bidirectional referrals to CBOs
- CHWs, team-based care, quality and utilization data parsed by demographics

PUBLIC HEALTH INTEGRATION

- Leadership
- Vaccines, testing, communications, therapeutics, and population health data
- Education and training programs

Quality and Utilization Improvement

Establishing data tools and quality improvement processes that allow practices to monitor their performance
CLINICAL QUALITY

Compared to national CMS reporting

The majority of practices continued to perform above the national median on both eCQMs. Note that these metrics are measured for all patients in the practice.
UTILIZATION

Compared to all practices with Equivalent Group MD FFS beneficiaries

Utilization decreased significantly when compared to historical, expected projections. Even after adjusting for the pandemic, MDPCP practices still performed better than the benchmark.

% of Practices' Clinical Quality and Utilization Outcomes Above and Below the 50th Percentile Benchmark, 2019 - 2020

Source: MDPCP 2020 Annual Report

*50% line denotes national median for quality measures and Maryland median for utilization metrics

ED Utilization and IP Admissions Per K, MDPCP-Attributed Beneficiaries and Equivalent Non-MDPCP Beneficiaries, 2019 - September 2021 (Q1 2022 Attribution)

Saving Lives While Saving Money

Reduction in Adverse Outcomes Associated With MDPCP Participation Relative to Comparison Group (All P-Values <0.05)

*The cumulative savings are less than the difference between 2019 and 2020 due to compounding.

HSCRC Difference-in-Differences in Net Costs (Cost Savings in Millions)
COVID-19 Outcomes

Relative to a comparison group using a matching analysis

Beneficiaries attributed to MDPCP practices had lower rates of COVID-19 diagnosis, inpatient claims, and deaths for the timeframe 1/1/2020 - 1/31/2021

Milbank Memorial Fund

COST

Compared to a closely-matched comparison group using a "difference-in-differences" analysis

MDPCP practices demonstrated reductions in utilization resulting in cost savings, even after accounting for the investment of program payments.

MDPCP 2020 Annual Report

Key Takeaways

Bring the MDPCP model to your state!

Maryland is demonstrating that it is possible to achieve statewide primary health care transformation

Statewide transformation produces equitable access, reduces costs, and saves lives

The success of this program can be replicated in other states
