

The need

In a 2020 survey, we asked parents of young children how the pandemic had impacted their families and child care arrangements. **1,245 parents and caregivers** from 42 of 46 counties in South Carolina responded.

87%

said the pandemic had disrupted their home and family life

83%

said they were more stressed and anxious than usual

75%

said they were worried about the mental health of their young children
