

Gilbert W. Beebe Symposium: The Science and Response to a Nuclear Reactor Accident  
May 13, 2014

# **Population Monitoring after a Radiation Emergency: The Early Response**

**Armin Ansari, PhD, CHP**

Radiation Studies Branch

# Disclaimer

*The findings and conclusions in this presentation are those of the author and do not necessarily represent the official position of the Centers for Disease Control and Prevention/the Agency for Toxic Substances and Disease Registry.*

# Examples of Radiological Incidents

- ❑ **Transportation accidents**
- ❑ **Nuclear power plant accidents**
- ❑ **Spent fuel storage leaks/spills**
- ❑ **Space vehicle accidents**
- ❑ **Gas explosion/fire at any licensed facility**
- ❑ **Acts of terrorism:**
  - Radiological Dispersal Device (RDD) – Non -explosive
  - RDD – Explosive (“dirty bomb”)
  - Radiation Exposure Device – hidden source

# **Radiation Incidents**

## **Impact on People**

- ❑ Fatality**
- ❑ Injury**
- ❑ Exposure to radiation**
- ❑ Contamination with radioactive material**
- ❑ Anxiety**
- ❑ Displacement**

# **Radiation Incidents Impact on People**

- ❑ Fatality**
- ❑ Injury**
- ❑ Exposure to radiation**
- ❑ Contamination with radioactive material**
- ❑ Anxiety**
- ❑ Displacement**

**Population  
Monitoring**

# Examples

- ❑ Hiroshima/Nagasaki (1945)
- ❑ TMI (1979)
- ❑ Chernoyl (1986)
- ❑ Goiânia (1987)
- ❑ Tokai-mura (1999)
- ❑ London (2006)
- ❑ Fukushima (2011)

## SCREENING OF RESIDENTS FOLLOWING THE TOKYO ELECTRIC FUKUSHIMA DAIICHI NUCLEAR POWER PLANT ACCIDENT

Hisayoshi Kondo,\* Jiro Shimada,† Choichiro Tase,† Takako Tominaga,‡ Hideo Tatsuzaki,‡  
Makoto Akashi,‡ Koichi Tanigawa,§ Yasumasa Iwasaki,§ Tatsuo Ono,\* Masayuki Ichihara,\*  
Yoshitaka Kohayagawa,\* and Yuichi Kido\*

- 72,660 people screened at 142 sites  
(March 11-21)
  - Peaked at 14,000 per day
- 244,281 people screened (3/12/11 – 2/10/12)
- 901 cases, between 13-100 kcpm
- 110 cases, > 100 kcpm
- All cleaned by removal of clothing and wiping. Showering was not needed.

July 2013 Issue

# Public Shelters & Reception Centers

## Japan 2011

# Radiation detected on airline passengers from Japan

*Higher-than-normal levels of radiation are found on clothing of passengers from Japan arriving in South Taiwan, but the levels don't appear to be dangerous passengers do not appear to be ill, reports say.*

**March 17, 2011** | By Rong-Gong Lin II | Los Angeles Times

之旅客。請由此輻射偵測門通過。

Passengers from Fukushima.  
Miyazaki. Ibaraki prefectures,  
Japan. Please walk slowly through  
this Radiation Monitor.

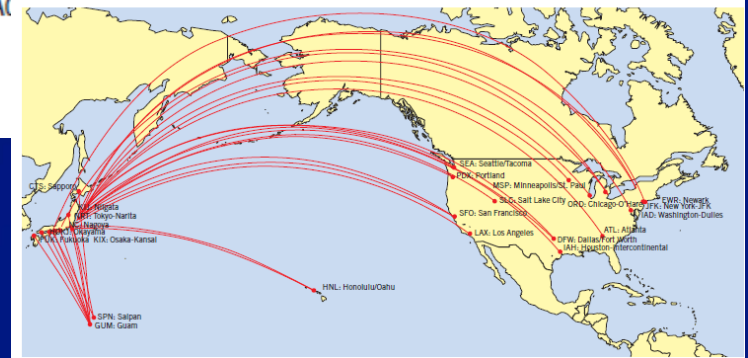

福島県宮城県および茨城県からお越  
しになられたお客様。

# US Screening of International Travelers for Radioactive Contamination After the Japanese Nuclear Plant Disaster in March 2011

Todd Wilson, MS; Arthur Chang, MD; Andre Berro, MPH; Aaron Still, MS; Andrew Demma, MS; Jeffrey Nemhauser, MD; Colleen Martin, MSPH; Al Frieda Fisher-Tyler, MHS; Lee Smith, MS; Onalee Grady-Erickson; Francisco Alvarado-Ramy, MD; Gary Brunette, MD; Armin Ansari, PhD; David McAdam, MA; Nina Marano, DVM

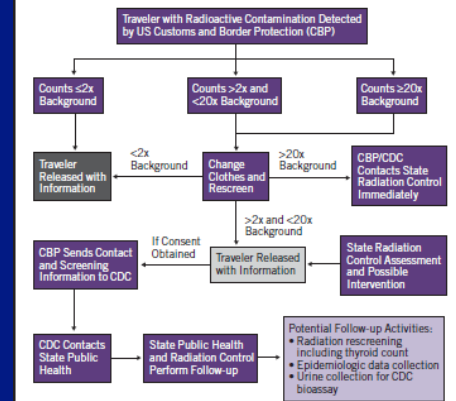

Scheduled Commercial Direct Flight Routes From Japan to the United States in March 2011.

*Disaster Med Public Health Prep.* 6(3):291-6

- Collaboration with state and local public health and rad control authorities, and U.S. Customs and Border Protection
- Approx. 543,000 travelers arriving directly from Japan at 25 US airports screened between 3/17 – 4/30/2011

## Centers for Disease Control and Prevention (CDC) Radiological Screening Program Algorithm for Travelers Returning to the United States From Japan After the Fukushima Daiichi Incident.

# Population Monitoring

- ❑ **Community Effort**
- ❑ **An integrated process**
- ❑ **Requires extensive planning**
- ❑ **Needs to be scalable and flexible**
  - **Prioritized needs of people at the time and location**
  - **Availability of resources**

# Population Monitoring: Early response

Evaluate potentially-affected population for:

- ❑ Urgent medical attention
- ❑ External Contamination
- ❑ Internal contamination

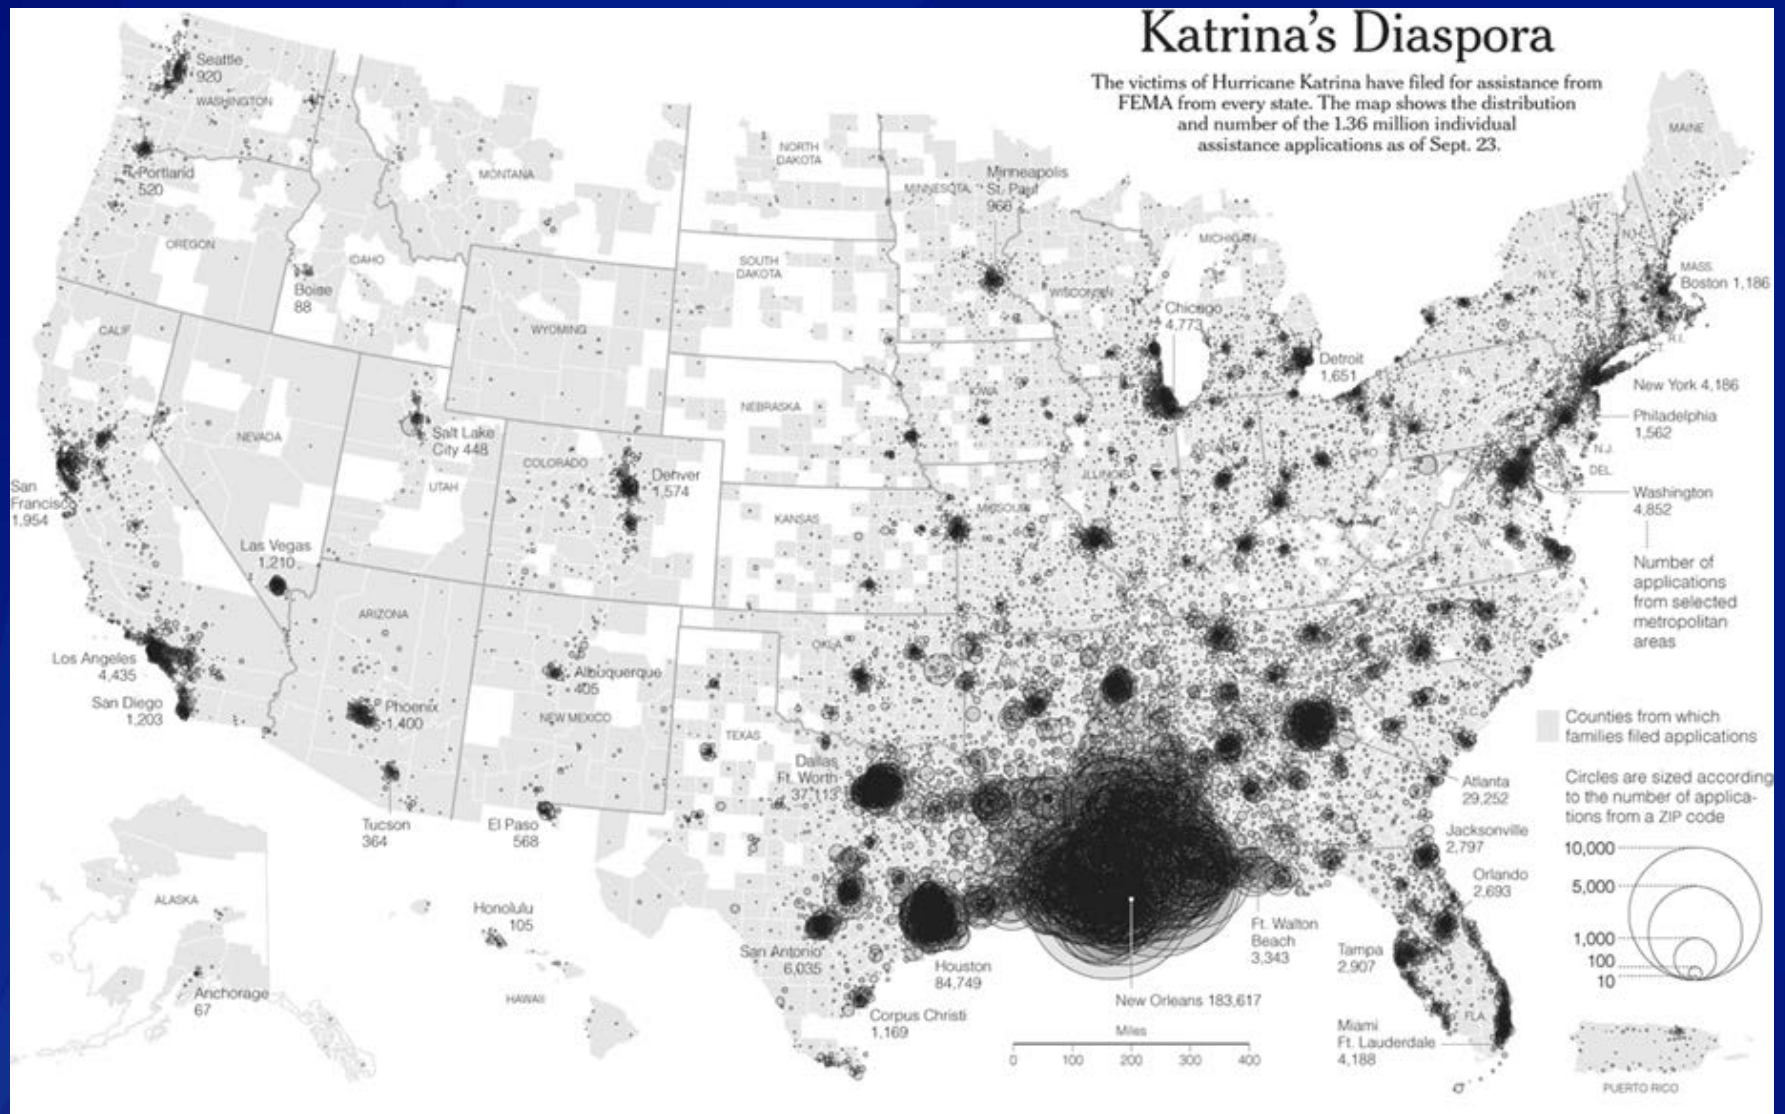

**Include Service animals and pets!**

**Would my community be  
impacted?**

# Affected Communities after Hurricane Katrina

Data from FEMA, published in *The New York Times*, October 2, 2005

# Local Response

- ❑ **Plan to receive a large population**
  - **Potential for contamination**
  - **Potential for injuries**
  - **Some may need immediate medical care**
  - **Most may need shelter/temporary housing**
  - **All would be stressed**

# National Response Framework Nuclear/Radiological Incident Annex

**Decontamination/Population  
Monitoring are:**

“the responsibility of State,  
local, and tribal governments.”

[www.fema.gov/emergency/nrf/](http://www.fema.gov/emergency/nrf/)

# Community Reception Center (CRC)

The place to conduct “population monitoring”

# Community Reception Centers (CRC)

Local response strategy for conducting population monitoring

- ❑ Multi-agency effort
- ❑ Staffed by local/state agencies and organized volunteers
- ❑ Opened 24-48 hours post incident
- ❑ Located outside hot zone
- ❑ Comparable to Points of Dispensing Sites (PODs)

# Community Reception Centers (CRC)

- **Services include:**
  - Contamination screening
  - Decontamination
  - Limited medical care
- **Main purpose is to prioritize people for further care**
  - Ease burden on hospitals
  - Manage scarce medical resources

# The Virtual Community Reception Center (vCRC)

- ❑ Web-based training
- ❑ Animated exploration area
- ❑ Interactive flow diagram
- ❑ Embedded video segments
- ❑ Supporting resources
  - Job Action Sheets
  - Forms
  - customizable for jurisdiction
