

A Brief Overview of BRHP's Housing Mobility Program

Adria Crutchfield, Executive Director

Our Mission

To expand housing choices for families with low incomes, who have historically been excluded from housing in well-resourced neighborhoods, helping them to access and transition successfully to safe, healthy, and economically vibrant communities.

Housing Mobility Research

- In 2015, Economist Raj Chetty published a study of the long-term outcomes of children from MTO families linking IRS tax records
- Chetty study found significant economic gains for children:
 - Every year spent in a better area during childhood increases a child's earnings in adulthood
 - Estimates imply that moving a child out of public housing to a low-poverty area when young (at age 8 on average) increases the child's total lifetime earnings by about \$302,000
 - Significant increase in college attendance rates

Who We Serve

Over 14,000 people served.

Over 4,000 families served throughout the Baltimore region. 97% are single headed households.

54% of program participants are children.

1,905 active property partners.

Guiding Principles for Counseling

Current Program Outcomes

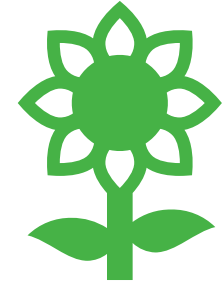

BRHP has 4,261 families leased in homes

68% of families reside in their first or second unit

On average, a family moves from their original unit after 4.8 years

67% of BRHP families reside in an Opportunity Area

2,411 of families are employed or recently employed

8.9% Post-Move Poverty Rate for families who moved in 2022

Healthy Children Voucher Demonstration

Program Goals

- **Short-term:** Establish partnerships and processes showing feasibility of a health-focused voucher program to assist and *counsel* 150 families
- **Long-term:** Reduce ER visits, increase wellness visits to PCPs, boost medical service savings, support families' choice to move to healthier environment, provide sustainable mode for scaling to other families

Who is eligible?

- Up to 150 families who **currently** have a **tenant-based** voucher.
- If a family has a child with a health need that may be aided by **moving** to a healthier home or environment, they may be eligible.
- Expectant mothers with a health condition are also eligible.
- Conditions for referral include but are not limited to anxiety, asthma, cancer, depression, diabetes, heart disease, high cholesterol, hypertension, and substance abuse.
