

Number of Diplomates by Year – American Board of Obesity Medicine

Data graciously provided by Dana Brittan, ABOM

Number of Patients with Severe Obesity per ABOM Diplomate

- **Approximately 17,600,000 US adults have severe obesity**
- **At current levels of ABOM diplomates, each diplomate would have to treat approximately 11,000 patients**

Distribution of Adults with Obesity among Primary Care Physicians

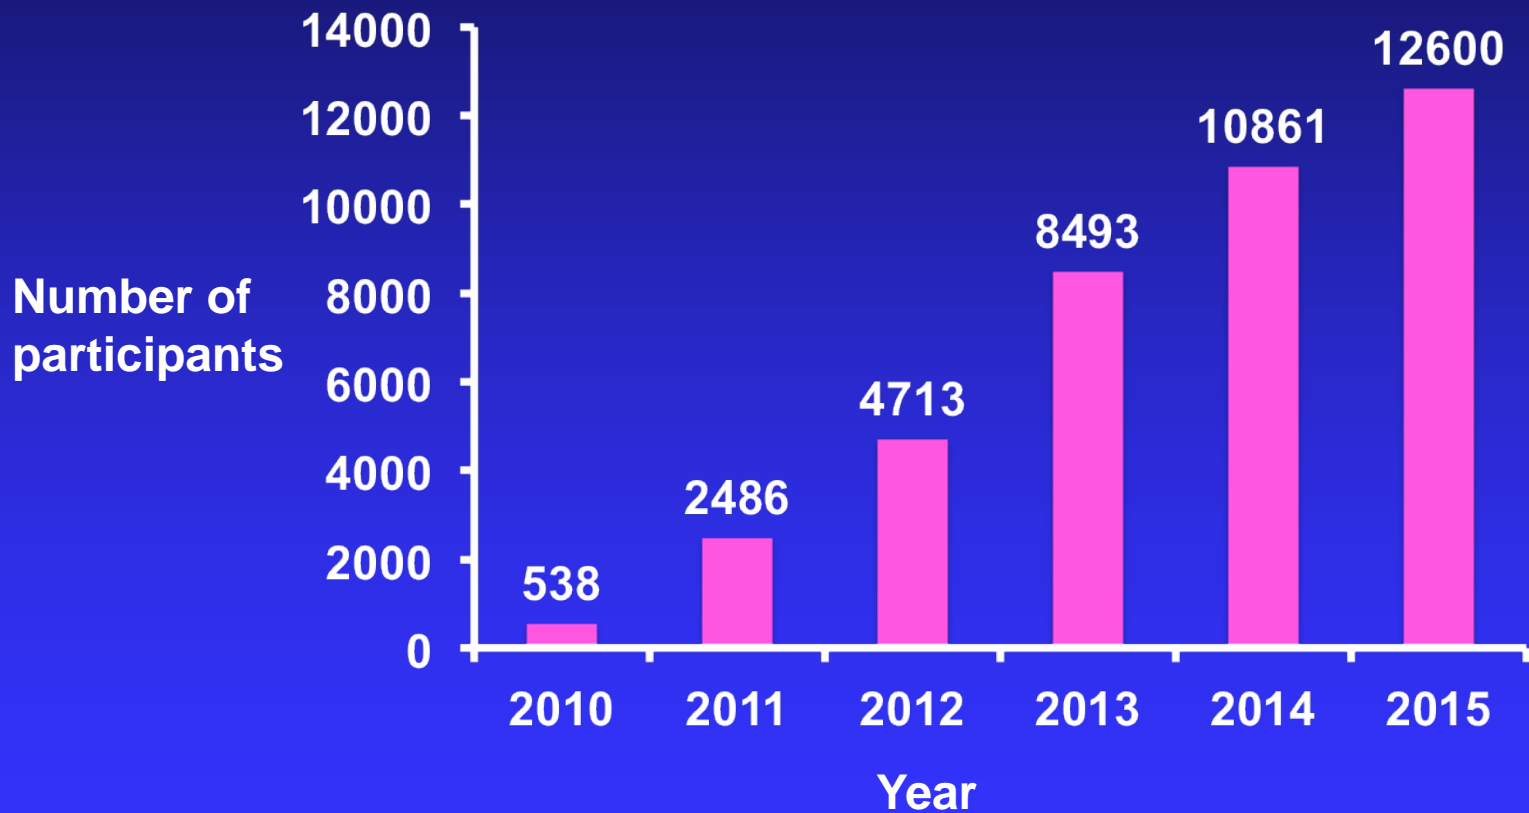

Physicians include family practitioners, general practice, internal medicine, and ob/gyn (n = 197,853)

BMI \geq 30 - 440 people/practitioner

BMI \geq 35 - 164 people/practitioner

BMI \geq 40 - 89 people/practitioner

Number of Participants by Year in the Y-DPP

Data graciously provided by Emily Greenberg Y-USA

Diabetes Prevalence and the Y-DPP

- 86 million US adults have prediabetes¹
- 220 Y-DPP programs in 2015 with average 57 participants
- To reach all prediabetics, approximately 1.5 million Y-DPP programs would be required
