AGENCY

# Innovations in pharmaceutical manufacturing on the horizon A virtual dissemination workshop

---

Session III. Challenges and opportunities

Presented by Dolores Hernan Perez de la Ossa, PhD  
Quality Specialist, Pharmaceutical Quality Office

An agency of the European Union

# EMA's mission

- Decentralised agency of the EU
- Founded in 1995
- Reg. (EC) No 726/2004
- The mission of the European Medicines Agency is to foster **scientific excellence** in the evaluation and supervision of medicines, for the **benefit of public and animal health**.

# To address our public health mission innovation is needed

- ✓ Medicines of the best quality – highly efficacious and good safety profile
- ✓ Address unmet medical needs
- ✓ Improve processes efficiency & reliability
  - ↑ Flexibility, agility
  - ↓ quality defects-> prevent shortages
  - ↑ Yields
  - ↓ environmental impact
  - ...

**We are open forward and encourage innovation!**

# General challenges

## Regulators

## Industry

Traditional mindset

Early visibility of cy's developments to ensure preparedness

Uncertainty/fear of its acceptance by regulators

Training

Potential need to adapt regulatory frameworks

Upfront capital investment

## Technical/regulatory challenges

- More and more complex systems/technologies: additive manufacturing, platform technologies.
- Performance based approaches-advanced process controls & automation, AI
- Portable modular systems
- Bed side manufacturing & decentralized manufacturing e.g. ATMPs
- Companion diagnostics
- Borderline products, etc

# What is EMA doing?

[https://www.ema.europa.eu/en/documents/regulatory-procedural-guideline/ema-regulatory-science-2025-strategic-reflection\\_en.pdf](https://www.ema.europa.eu/en/documents/regulatory-procedural-guideline/ema-regulatory-science-2025-strategic-reflection_en.pdf)

5

Goal 1: Catalysing the integration of science and technology in medicines' development

- Facilitate the implementation of novel manufacturing technologies
- Support translation of ATMPs into patient treatments
- Develop understanding of, and regulatory response to, nanotechnology and new materials in pharmaceuticals

Goal 5: Enabling and leveraging research and innovation in regulatory science

## A pharmaceutical strategy for Europe

Adopted on 25 November 2020, the [Pharmaceutical Strategy for Europe](#) (reader-friendly version  ) aims at creating a future proof regulatory framework and at supporting industry in promoting research and technologies that actually reach patients in order to fulfil their therapeutic needs while addressing market failures. It will also take into account the weaknesses exposed by the coronavirus pandemic and take appropriate actions to strengthen the system.

[A pharmaceutical strategy for Europe | Public Health \(europa.eu\)](#)

*... 'aims at creating a future proof regulatory framework and at supporting industry in promoting research and technologies that actually reach **patients** in order to fulfil their **therapeutic needs** while addressing market failures. It will also take into account the weaknesses exposed by the coronavirus pandemic and take appropriate actions to strengthen the system'...*

## Existing opportunities for dialogue with EMA on CMC innovation

## Global dimension

- ✓ Industry to work together, in collaboration with academia/research institutions, and liaise with regulators as needed.
- ✓ Applicants to allow regulators to discuss their applications among themselves.
- ✓ National regulations to allow regulators to share & discuss CCI information.
- ✓ ....

## Take home messages

- Innovation is needed for the benefit of public health.
- Industry and regulators share the responsibility to make it happen.
- All parties have challenges, but should work together to overcome them.
- **Early dialogue** is essential to pave the way and ensure there is a mutual understanding.

*thank  
you*
