From N-of-1 to N-of-all: Clinical Decision Making in the Era of Big Data and Personalized Medicine

Mia Levy, MD, PhD

National Cancer Policy Forum

10.30.2018

Disclosures

- **Consulting/Advisory:** GenomOncology, Personalis, Roche
- **Research funding:** Pfizer, BMS, GenomOncology
- **Equity:** GenomOncology, Personalis

Work presented today funded in part by research grants from:

GenomOncology
BATTLING CANCER, ONE GENOME AT A TIME

Pfizer

Bristol-Myers Squibb

susan g. komen

NIH
National Human Genome Research Institute

If You Can't Measure It, You Can't Improve It

(William Thomson, Lord Kelvin)

AND WARREN HERE IS IN CHARGE OF OUR GUT FEELINGS

Implementation Research: the scientific study of barriers to and methods of promoting the systematic application of research findings into practice

Evolution of Clinical Decision Support

Evidence Driven

Protocol Driven

Pathway Driven

Data Driven?

Riding the Tsunami of Genomic Data

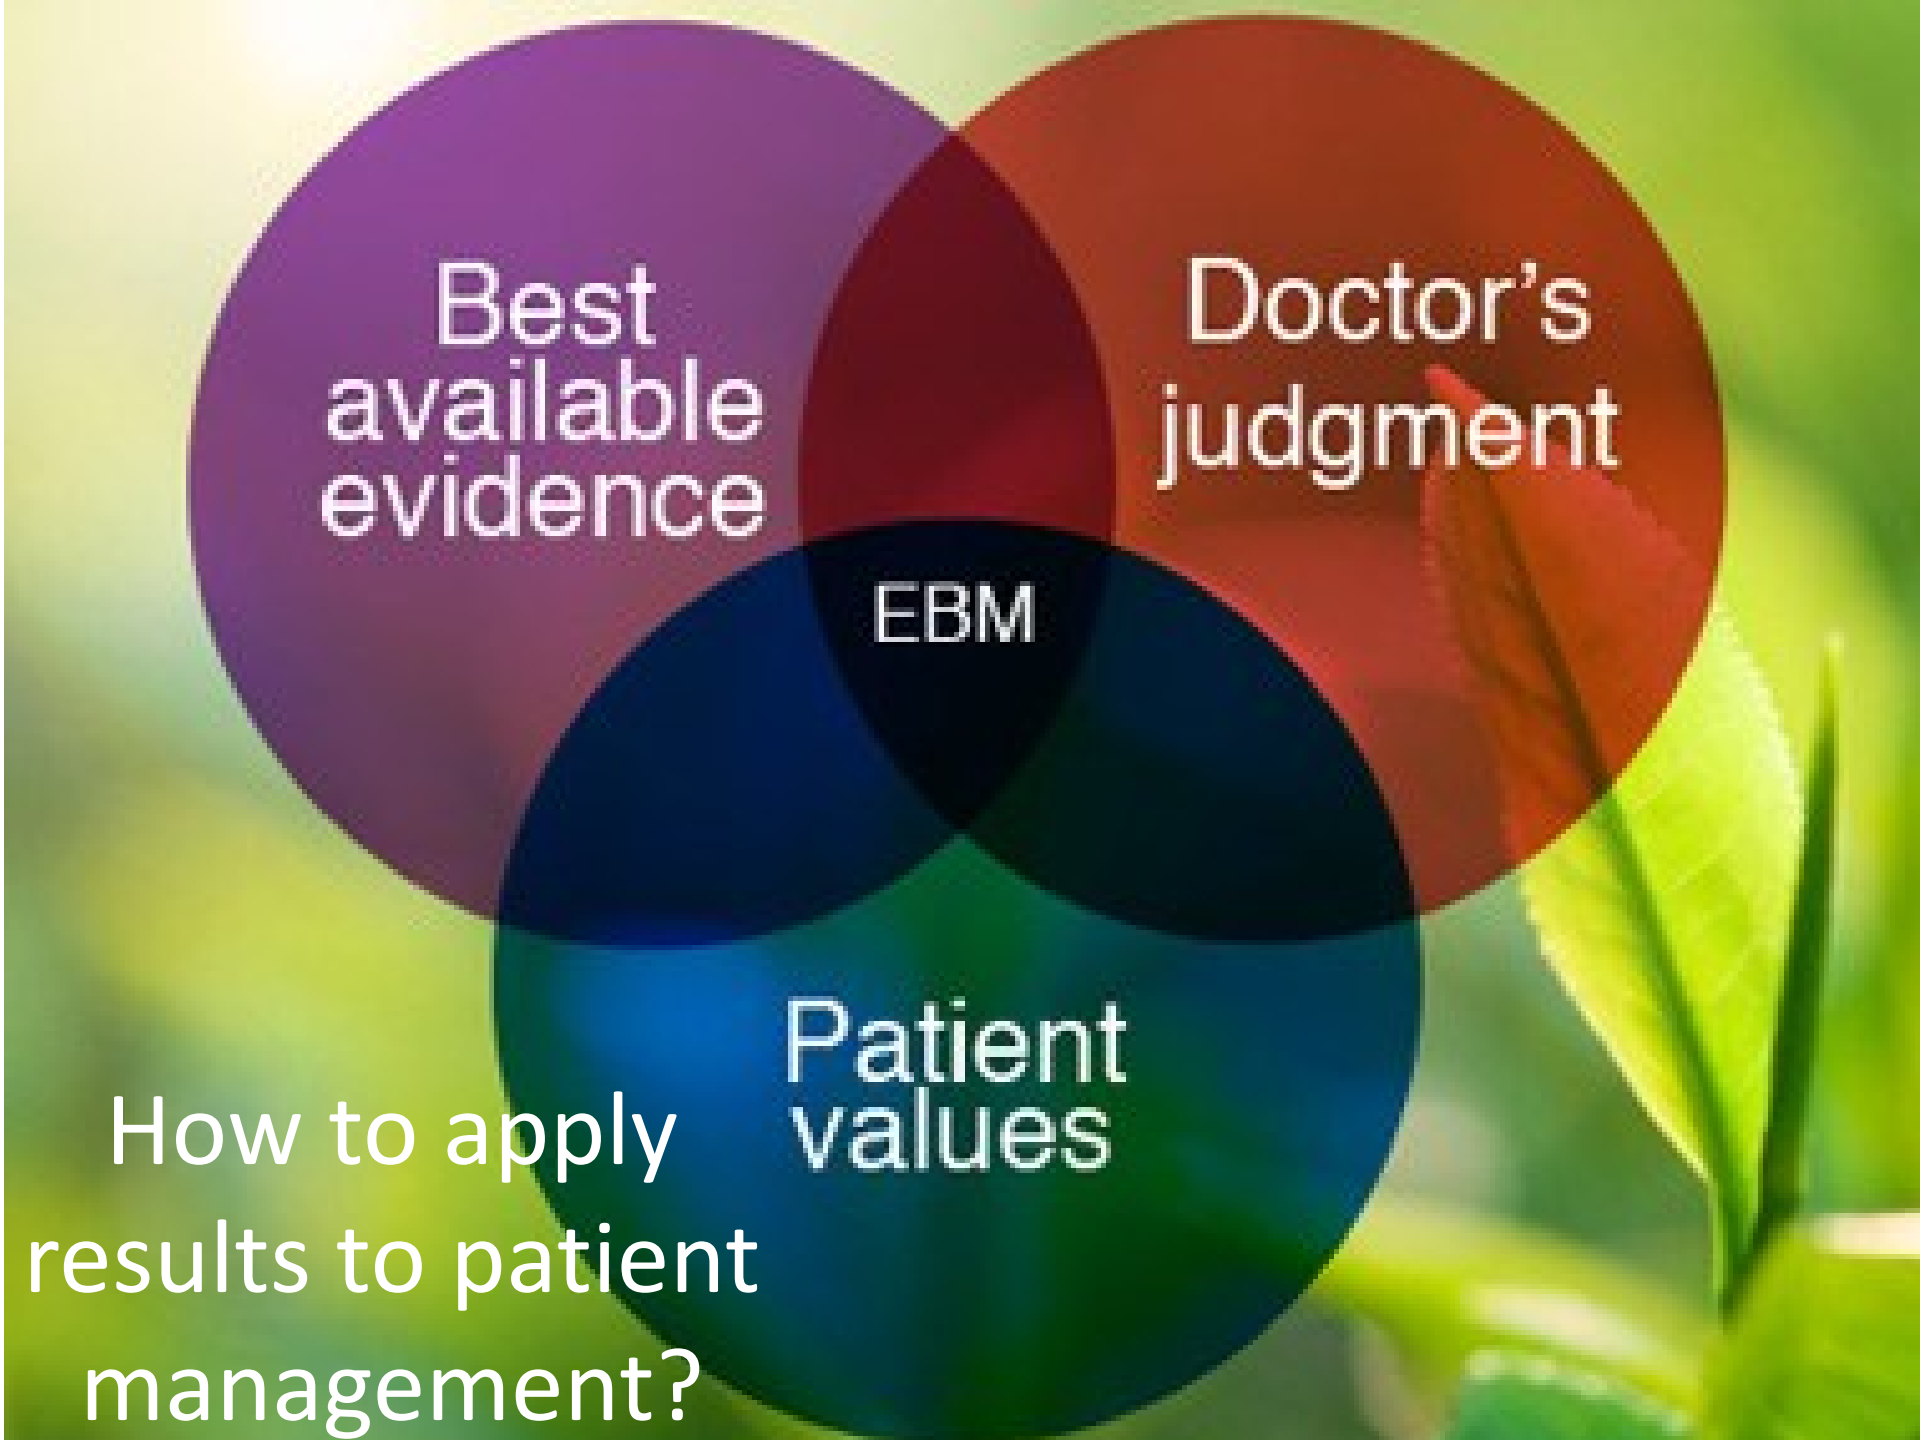
Evolution of testing strategies

Single mutation -> Hot spot panels -> NGS

Decision Support

Which test to order?

How to interpret & report results?



How to apply results to patient management?
