

Approaches to redesigning radiation therapy and opportunities for further progress

Justin E. Bekelman, MD

Presentation to the National Cancer Policy Forum

Addressing the Adverse Consequences of Cancer Treatment

Penn Medicine
Abramson Cancer Center

5 approaches to radiotherapy redesign

Goal: High-value, high-quality radiotherapy to improve health and health equity

- 1. Make high-value, high-quality care frictionless for clinicians and patients**
- 2. Align clinician financial and non-financial incentives to payment models**
- 3. Accelerate team-based care**
- 4. Invest in a diverse, culturally competent clinical workforce**
- 5. Partner and innovate together with payers to promote access and affordability**
