COVID-19 has fundamentally challenged the delivery of health care services worldwide, forcing difficult choices on health professionals and laying bare many preexisting health, medical, and public health sector frailties. This National Academies workshop series will re-explore previous IOM Crisis Standards of Care recommendations in light of ongoing lessons from the COVID-19 pandemic, with a particular focus on disaster planning, legal and equity considerations, and staffing considerations.

In this fifth and final virtual workshop of the series, expert panelists will specifically:

- Reflect on the challenges and opportunities presented in webinars 2-4
- Articulate potential opportunities to enhance the CSC framework and improve guidance for planning, activation, implementation, and evaluation/monitoring
- Suggest focus areas for a potential research agenda related to CSC planning, activation, implementation, and evaluation/monitoring

Agenda

- | | |
|----------------|---|
| 12:00pm | Opening Remarks [5 min] <ul style="list-style-type: none">• Eric Toner, MD, Senior Scholar, Senior Scientist, Center for Health Security, Johns Hopkins University |
