

Costs and Approaches for Municipal Solid Waste Recycling Programs

Informational Gathering

Bevin Ashenmiller

Bevin Ashenmiller is an Associate Professor of Economics at Occidental College. She started her research career studying beverage container recycling and the impact of bottle laws on city level crime and employment. She spent the 2012-2013 academic year working as the Senior Economist for Energy and the Environment at the White House Council of Economic Adviser. Her current research focuses on how greening urban public schools can support climate adaptation policy by managing storm water and providing ecosystem services while simultaneously improving the academic, behavioral and health outcomes of children and youth.

W. Kip Viscusi

W. Kip Viscusi is Vanderbilt's first University Distinguished Professor, with tenured appointments in the Department of Economics, the Owen Graduate School of Management and the Law School. Before joining the Vanderbilt faculty, Professor Viscusi was the Cogan Professor of Law and Economics and director of the Program on Empirical Studies at Harvard Law School. He has also been the Allen Professor of Economics at Duke University and professor of economics at Northwestern University.

Viscusi is the award-winning author of more than 30 books and over 400 articles, most of which deal with different aspects of health and safety risks. His pathbreaking research has addressed a wide range of individual and societal responses to risk and uncertainty, including risky behaviors, government regulation and tort liability. He is widely regarded as one of the world's leading authorities on benefit-cost analysis. Viscusi's estimates of the value of risks to life and health are currently used throughout the federal government. His book *Pricing Lives: Guideposts for a Safer Society* synthesized much of his work in this area. In the Carter administration, he was deputy director of the Council of Wage and Price Stability, which was responsible for White House oversight over all new federal regulations. He has served on different panels of the Science Advisory Board of the U.S. Environmental Protection Agency for over a decade. Viscusi has served as president of the Society for Benefit-Cost Analysis and the Southern Economic Association.

Viscusi is the founding editor of the *Journal of Risk and Uncertainty*, which he has edited since 1988. He recently collaborated with Joseph Harrington and David Sappington on the fifth edition of his textbook, *Economics of Regulation and Antitrust*, which has retained its monopoly position in that field. In 2019 he received the [Earl Sutherland Prize for Achievement in Research](#), Vanderbilt's most prestigious honor for faculty research and scholarship. He is the third most frequently cited U.S. law professor according to Brian Leiter's Law School Reports (Google Scholar h-index).
