Pathogen exposure in laboratory settings

Luis Ochoa Carrera, MSc., MRM.

Senior Advisor

PANDEMICTECH

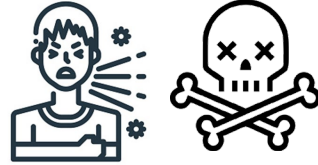

Global Health
Security Fund

LAI/exposures and the questions we need to answer

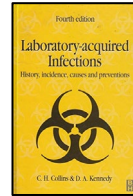

- Why lab exposures occur
- What happens when there is a lab exposure
- What sectors are the most affected with pathogen exposures
- What do we know about lab exposures
- What we don't know about lab exposures
- What are the things that we have been doing when we detect a LAI/exposure
- What are the things that we have not been doing when we detect a LAI/exposure
- What else is missing
- How exposures affect the scientific development
- Where do we need to invest more to prevent lab exposures from happening

LAI/Exposures

What happens after a lab exposure

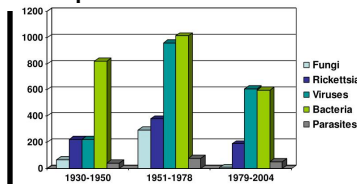

Why lab exposures occur?

What are the things that we have been doing when we detect a LAI/exposure

What do we know about lab exposures

*

What else is missing?

Where do we need to invest more to prevent lab exposures from happening

Laboratory-acquired infections
Laboratory exposures

How LAIs/exposures affect the scientific development

What do we don't know about lab exposures

un known

What are the things that we have not been doing when we detect a LAI/exposure

What sectors are the most affected with pathogen exposures?

*
